ACKNOWLEDGEMENT

I would like to gratefully acknowledge the enthusiastic supervision of Prof. M.Afshar Alam for his continued encouragement and invaluable suggestions during this work.

This study is an interdisciplinary one, an integration of computer science and biotechnology. I am deeply indebted to Prof. S.K.Jain for his guidance, suggestions and help in understanding the biological concepts involved in this research.

I am grateful to all my friends in the Department of Computer Science for their encouragement, help and support.

I would like to thank the office staff of the Department of Computer Science and Department of Biotechnology, Jamia Hamdard for all help rendered during my research.

I am deeply thankful to the anonymous reviewers of my published papers. Also I am extremely grateful to the organizers of the conferences BCBGC’08 (held at Florida, USA) and ICIC’08 (held at Shanghai, China) for providing forums to present the papers and interact with the researchers in this field. These interactions helped me a lot in preparing the thesis in this form.

Finally, I am heartily thankful to my family for their patience and support.

SEEJA K.R
