Ph.D. is not just another degree, but it marks the culmination of very long years of academic education. Even though this thesis is an outcome of my idea and imagination, its equally true that this would not have been possible without many people who have crossed my path or walked beside me along my journey towards this outcome. I would like to take this opportunity to thank one and all who has contributed to my learning process during this journey.

How can I forget the selfless sacrifice and immense support of my parents that made me able to fulfil my dreams? My parents have played a vital role in successful completion of my Ph.D. It’s a long journey, and my father is always just beside me keeping his hand on my shoulder to give all the support what a father can give to his dearest son to see him on the top of the world. My mother’s unconditional love, care and prayers are always with me. She always wanted to see me to achieve the apex of education; and I am still climbing the apex because of her love and wishes. My parents are first and the last to believe that I can achieve my dreams. I don’t like to thank my mummy and papa by means of just few words. Today I bow down in front of them for everything.

Language is the most eloquent medium of human expression, yet on this occasion I am ineffable to express my heartfelt gratitude and sincere thanks to my worthy guide, Dr. Manish Nivsarkar. It cannot be argued with that the most influential person in my research career has been my Guide. Sir’s passion, guidance, and discipline have been indispensable to my growth as a scientist and as a person over these past five and a half years. I am especially grateful to him for his devotion for my education and success. I have not heard of another professor who goes so far out of his/her way to make sure that students are prepared for whatever the next step in their journeys may be. He has not only guided me in my Ph.D. thesis but also taught me some of the important lesson of life. I am indebted to him more than he knows.

With great pleasure and reverence, I express my debt of profound gratitude to my co-guide, Dr. Neeta Shrivastava, for her supervision, advice and technical guidance from the very early stage of this research work as well as giving me extraordinary
experiences throughout the work. I am indebted to her for kindly providing me all the shRNA expression vectors along with other supporting plasmid vectors which I have used in this research work. Without her help it would be very difficult for me to complete this work in stipulated time span. Her conceptual and technical insights into my work have been invaluable.

I would like to record my sincere gratitude to **Dr. Lawrence Rothfield**, University of Connecticut, USA, for kindly providing me the delivery system, backbone of this work, *E.coli* PB114, a minicell producing strain. It was really a great help for me to initiate my research work. I would also like to express my special thanks to **Dr. John Wertz**, Coli Genetic Stock Centre, Yale University for kindly providing other minicells producing strains, *E.coli* K-12 x984 and *E.coli* p678-54 used in this work.

I express my personal thanks and appreciation to **Dr. Kamala Vasu**, for her encouragement, support and loving gestures throughout the tenure of my research work. I would also like to thank her along with respected **Sudarshanam Sir** and **Mr. Niraj Sakharani** for helping and guiding me in one of the most crucial part of this research work, folic acid conjugation reaction.

I would fail in my responsibilities as a member of the scientific fraternity if at this point I do not duly acknowledge the most active and renowned scientists in the minicell research who have shared their knowledge with me. I sincerely thank **Prof. Piet De Boer**, **Dr. Jennifer MacDiarmid**, **Dr. Himanshu Brahmbhatt**, **Dr. Levy**, and **Dr. P.S Low** for sharing their valuable knowledge and guiding me throughout my research work.

My special thanks to **Dr. Priti Desai** for her precious support and valuable guidance during my entire research work. She has helped me to initiate first experiment of my research work.

I owe my sincere and heartfelt thanks to **Dr. Mille Agarwal** for giving me training on RT-PCR reaction and valuable suggestion during my thesis writing. She has always welcomed me for solving all the doubts regarding my research work and provided me with solutions and encouragement for further thinking and learning.
My heartfelt thanks to Dr. S. Laksmi for her encouragement and providing me advanced training in animal cell culture handling.

I am grateful to Dr. Sheetal Anandjiwala and Dr. Anita Mahapatra for their valuable support in my research work other than Ph.D. thesis.

I sincerely thank Dr. Prabhudas Patel and Dr. N.K. Jain who agreed to be the external reviewers of my research progress committee (RPC) and for their constructive feedback and comments.

I take this opportunity to sincerely acknowledge Council of Scientific and Industrial Research (CSIR) for awarding me Senior Research Fellowship (SRF) for this project.

I express my personal thanks to my lab mates namely Rita Madam, Ruma Madam, Nirav, Rakesh, Ranjeet, Sandeep, Vaseem, Manika, Devendra, Swapnil and Malvi for their constant support and encouragement. Major part of my Ph.D. research work was dependent on other labs. My lab mates have made me free from routine lab work for my uninterrupted and efficient work.

Special thanks to Nirav who helped me as and when required from my first day at PERD centre without giving a second thought. He was always ready to extend all possible help, which gave me great encouragement. He is my asset and the place to be solaced.

I specially thank to Ranjeet who have always been a great inspiration for me. Ranjeet and I shared so many special moments, contributing to a common story whose colourful pages now lead me towards a new chapter. He has been an invaluable support, helping hand to me, in brief he is more than a friend.

My heartfelt thanks to Dr. Anshu Shrivastava, Indira, Pooja, Sheetal and Sonal for providing me with the cordial and friendly environment during my research work at Pharmacognosy and Phytochemistry lab. Here, I would like to give my personal thanks to Indira for her constant support and encouragement throughout my research work.

I would express my gratitude to the entire team of Cell and Molecular biology lab, namely Niraj, Dr. Suhani Almal, Anoorupa, Shivangi, Bhrugu, Sneha, Drashya, Nayan, Ankita, Maitree for their support and kind help during my research work.
I convey my special thanks to **Niraj** for giving his valuable time and important suggestion during my research work. I would also like to thank him for his kind help in in vitro delivery studies.

Special thanks to **Dr. Amita Joshi**, **Dr. Milee Agarwal** and **Ranjeet** for proof reading of my thesis and manuscripts.

I sincerely thank **Dr. Arpan Chudasama** and **Brijesh** for their help in size analysis by Zeta Sizer.

I thank my friend namely **Dhaivat, jayesh** and **Sundari madam** for their help during my work in medicinal chemistry department.

I sincerely thank late **Mr. Ranjit Jagdale** for his guidance and help to designing my project proposal.

I express my gratitude to All the faculties of PERD and NIPER such as **Sweta madam**, **Dr. Neelam Chauhan** for their direct or indirect help in completion of my research work.

I sincerely thank my seniors namely, **Dr.Aryamitra Banerjee**, **Dr. Bhupendra Chauhan**, **Dr.Hitesh Jalani**, **Dr. Arshi Baraiya**, **Dr. Amit Pandya** and **Dr. Rahul Joshi** for providing me inspiration and valuable feedback during my research work.

I would express my gratitude to the entire administrative and non-scientific staff of PERD centre, namely **Mrs. Saraswati Kurup**, **Mr. Jakob Koshy**, **Vinayakbhai, Trivedibhai**, **Dineshbhai**, **Prakashbhai**, **Sujeetbhai**, **Bhaviniben**, **Amrutbhai**, **Madhav, Jasanibhai** for their help and support.

I thank all the attendants namely **Mangalbhai, Pravinbhai, Kuralal, Sanjaybhai, Shamjibhai** for their prompt help, washing of my glassware and special attention to my experimental animals in the animal house.

One of the most important person who came into my life at the crucial time of my research work is my loving wife, **Upasana**. I must not forget the sacrifice she has given during the most memorable period of our life for the sake of my research work. Her advent into my life during this vital period was a turning point of my research
curriculum. I would like to thank her from the bottom of my heart for her steadfast support, patience and assistance in every step of my thesis.

My loving thanks to my younger sister Heta for her unconditional love, support, encouragement and persistent confidence in me.

My heartfelt thanks to my Grandfather for his blessings and who has forever kept his kind hand over shoulder to help me see brighter horizons in the coming future.

I owe so much thanks to my Parents in Law who have always supported, encouraged and believed in me in all my endeavours.

I would like to thank everybody who were important to the successful realization of this thesis as well as express my apology that I could not mention personally one by one.

Eventually, I thank almighty for guiding me through rough and torn paths and always provided me everything at the right time I waned.

Mehul Jivrajani
