BIBLIOGRAPHY

Part –I: Books

- Mark A. Ludwig, (1996), The Little Black Book of Computer Viruses
- Eric Filio, (2005), Springer, Computer viruses: from theory to applications
- Karsten Johansson, (1994), COMPUTER VIRUSES: The Technology and Evolution of an Artificial Life Form
- Matt Smith, HackerProof: Your Guide to PC Security
- Peter Szor, (2005), The Art Of Computer Virus Research And Defense
- Sophos, (2004), Viruses and spam
- Snorre Fagerland, Sylvia Moon, Kenneth Walls, Carl Bretteville, (2001), The Norman Book on Computer Viruses
- Ms. Nandita. G, Computer virus
- Sophos, (2001), Computer viruses demystified

Part –II: Report

- McAfee – Network Security & Management, Current Computer Virus Threats, Countermeasures and Strategic Solutions - White Paper
- Matt Bishop, An overview of computer virus in research environment
- Enterprise Security Department of Information Technology August 2007, Protecting Your Computer and Your Identity
- IATEC, (2009), Malware, Information Assurance Tools Report
Part –III: Theses

- Rainer Link, Prof. Hannelore Frank, Prof. Dr. Rainer Mueller, (2003) Server-based Virus-protection On Unix/Linux
- Matthew PaulWebster, (2008), Formal Models of Reproduction: from Computer Viruses to Artificial Life
- Xin Li, Viiveke Fåk,(2003), Computer Viruses: The Threat Today and The Expected Future
- Roberto Dillon, (2007), A simple guide to Computer Viruses and other dangerous little programs - An Introduction to an Effective Defense
- Marko Helenius, PrettI JarvInen, (2002), A System to Support the Analysis of Anti-virus Products' Virus Detection Capabilities
- Markus Fors, Christian Grahn, Stefan Alfredsson, (2010), An implementation of a DNS-based malware detection system
- Daniel J. Cross, Luiz Felipe Perrone, (2005), An Investigation into the Human/Computer Interface from a Security Perspective
- Ali Ikinci, Prof. Dr.-Ing. Felix C. Freiling, Prof. Dr.-Ing. Wolfgang E_elsberg, (2007), Monkey-Spider: Detecting Malicious Web Sites
- Raghunathan Srinivasan, (2007), Protecting Anti-Virus Software Under Viral Attacks
- Johan Sandin, (2005), An Overview of Malware Protection Approaches on Client Computers
- Najib Bin Limun, (2005), The Use Of Intrusion Prevention System To Increase Computer Security
