ACKNOWLEDGEMENTS

I am deeply obliged to my research guide and mentor Prof. V.A. Bapat for giving me the opportunity to start my research career. His valuable guidance and creative input has always encouraged me to perform my best. Appreciations for inculcating in me the scientific aptitude and positive attitude may not be fulfilled only by a small word THANKS. His social deeds and positive approach towards life have strengthened my attitude during my research period and I hold by heart these good thoughts throughout my life.

I would express my profound gratitude to my research co-guide Dr. Mrs. J.P. Jadhav for her valuable encouragement, inputs and suggestions during my Ph.D. work. My sincere thankfulness would be for her suggestions and recommendation for Ph.D. registration and DRF (Department Research Fellow) at the start of my research career.

This dissertation is the outcome of experience, advice and encouragement of both of my guide and co-guide.

My profound thanks would be to Prof. S.P. Govindwar, Department of Biochemistry, SUK for his kind suggestions and for providing me a few of the research facilities at the Department of Biochemistry and I am also thankful to Prof. S.R. Yadav, Department of Botany, SUK for his suggestions and help during my research work. My thanks would also be to Dr. Mrs. Bhargava, Department of Botany, UoP and to Dr. Nitin Desai, Dr. D.Y. Patil College, Mumbai for their help during my research.

Acknowledgements would be to Department of Biotechnology, Shivaji University, Kolhapur for proving me DRF and laboratory space and facilities. Acknowledgements would also be to Common Facility Center, Shivaji University, Kolhapur for providing facilities of analytical techniques.

My sincere thanks would be to all the teaching and non-teaching staff of the respective Department of Biotechnology, Biochemistry and Microbiology for their direct or indirect help during my research work.

My deep gratitude is to all my research friends and colleagues for their any-time-help during my research period.

Finally, thanks would be from the bottom of my heart to my beloved parents and grandparents for their moral support, care, emotions, and responsiveness to achieve this goal. I would be deeply thankful to my younger brother for his support to me and our family.
