“Cease not to give thanks for you, making mention of you in my prayers”- Ephesians 1:16

A long tenure of almost three years is described in bunch of words which, at times seems very difficult. Just that today this entire hard bounded pages of monograph which appears as thesis, an evidence of my work is actually a accumulation of small and big talks, funny and abstract tips, smart and hard work, bore and boredom facts, gained and wasted time, determination and anticipation, rejections and appreciations by every individual who had been in my life during the period of work.

No matter what it may, Life is lived by an individual however it is actually directed by a teacher, a guide. I am grateful to God for sending my Guide (Dr. Kinnari Mistry) as an angle in my life. I can’t thank enough to my guide Dr. Kinnary Mistry (Associate Professor, Department of integrated Biotechnology, ARIBAS) for being supportive throughout the tenure, her belief in me actually helped me to know my own optimum compatibility to compete with own self, her grace and her knowledge modules me from a stone to sculpture, her friendly nature always appreciated my scientific approach and her discipline never let me get out of my track. From the time I entered in the laboratory as a Ph.D student I have and will always continue to have the utmost confidence in her advice and her ability to make me into a better person both scientifically and personally. I would like to quote Dr. Nilanjan Roy (Director, ARIBAS), a true scientist who actually changed the way of life of every student, explained science as life and life towards science, his dedication towards his work itself appeared as an inspiration to every individual. Responsibility was just understood as term
however it appeared as duty and discipline towards own work ethic was inculcated by the works of Dr. Roy. His criticism at times regarded own self as useless however the solutions actually denoted a true perseverance for achieving anything.
