# CONTENTS

**Acknowledgement** vii

**Abstract** ix

**List of Figures** xv

**List of Tables** xx

**Nomenclature and Acronyms** xxi

**1 Introduction** 1

1.1Background about industrial drives & its applications 1

1.1.1 Scalar Controllers 4

1.1.2 Vector controllers 5

1.1.3 Field Acceleration Control 5

1.2 Review of simulation concepts 5

1.3 Plan of Investigation 7

**2 Literature survey** 10

2.1 Review of conventional type control methods 10

2.2 Review of DTC methods 13

2.3 Review of PI control methods using fuzzy 16

2.4 Review of Mamdani based FLC methods 17

2.5 Review of Takagi Sugeno based FLC methods 21

2.6 Review of Neural Network based controllers 23

2.7 Review of The ANFIS control method 26

2.8 Motivation for the research 32

2.9 Problem identification 34

**3 Mathematical Modeling of Induction Motors** 37

3.1 Introduction 37

3.2 Review of the SVPWM technique 39

3.2.1Operational principle of PWM 40

3.2.2 Generation of space vectors in PWM control 41

3.3 The dynamic *d-q* model using park's transformation 46

3.4 Dynamic kron equation machine model 56

3.5 Dynamic Stanley equation machine model 61

**4 Design & Simulation of PI controller based drive system** 64

4.1 Review on PI control strategy 64

4.2 Development of the simulink model 66

4.3 Simulation results & discussions 68

4.4 Summary 72

**5 Design & Simulation of Mamdani-FLC based drive system** 73

5.1 Introduction 74

5.2 Review of Mamdani based FL controller design 75

5.3 Development of the simulink model 83

5.4 Simulation results and discussions 83

5.5 Summary 93

**6 Design & Simulation of Takagi-Sugeno FLC based drive System** 94

6.1 Introduction 95

6.2 Review of Takagi-Sugeno fuzzy control 96

6.3 TS based controller design 98

6.4 Development of the simulink model 100

6.5 Simulation results and discussions 102

6.6 Justification of robustness issues 110

6.7 Summary 116

**7 Design & simulation of an ANFIS controller based drive System** 118

7.1 Introduction 119

7.2 ANFIS Concept 120

7.2.1 The ANFIS model 121

7.3 ANFIS Controller design 124

7.4 Development of the simulink model 128

7.5 Simulation results and discussions 129

7.6 Justification of robustness issues in speed control 139

7.7 Summary 148

**8 Comparative analysis of the designed controllers** 150

**9 Conclusion & Future Work** 155

9.1 Conclusion 155

9.2 Future Work 156

**Bibliography/References** 158

**Research papers published during research tenure in JNTU** 172
