

LIST OF TABLES

Table No.	Title	After Page No.
1.	Reported hyper-accumulators in plant kingdom.	24
2 a.	Physico-chemical characteristics of the initial soil.	34
2 b.	Analytical procedures used in soil and plant analysis.	34
3 a.	Influence of amendments and added metals on DTPA extractable zinc (mg kg ⁻¹) in soil (after 6 months period).	40
3 b.	Influence of amendments and added metals on DTPA extractable zinc (mg kg ⁻¹) in soil (after 12 months period).	40
4 a.	Influence of amendments and added metals on diacid extractable zinc (mg kg ⁻¹) in soil (after 6 months period).	40
4 b.	Influence of amendments and added metals on diacid extractable zinc (mg kg ⁻¹) in soil (after 12 months period)	40
5 a.	Influence of amendments and added metals on DTPA extractable copper (mg kg ⁻¹) in soil (after 6 months period).	41
5 b.	Influence of amendments and added metals on DTPA extractable copper (mg kg ⁻¹) in soil (after 12 months period).	41
6 a.	Influence of amendments and added metals on diacid extractable copper (mg kg ⁻¹) in soil (after 6 months period).	41
6 b.	Influence of amendments and added metals on diacid extractable copper (mg kg ⁻¹) in soil (after 12 months period)	41
7 a.	Influence of amendments and added metals on DTPA extractable nickel (mg kg ⁻¹) in soil (after 6 months period).	42
7 b.	Influence of amendments and added metals on DTPA extractable nickel (mg kg ⁻¹) in soil (after 12 months period).	42
8 a.	Influence of amendments and added metals on diacid extractable nickel (mg kg ⁻¹) in soil (after 6 months period).	42
8 b.	Influence of amendments and added metals on diacid extractable nickel (mg kg ⁻¹) in soil (after 12 months period).	42
9 a.	Mean values of extractable metals for different extractant (after 6 months period).	43
9 b.	Mean values of extractable metals for different extractant (after 12 months period).	43
10.	Effect of various treatments of amendments and added metals on drymatter yield of <i>B. juncea</i> at flowering.	43
11.	Effect of various treatments of amendments and added metals on zinc concentration in <i>B. juncea</i> at flowering.	44

12.	Effect of various treatments of amendments and added metals on copper concentration in <i>B.juncea</i> at flowering.	45
13.	Effect of various treatments of amendments and added metals on nickel concentration in <i>B.juncea</i> at flowering.	46
14.	Effect of various treatments of amendments and added metals on zinc uptake in <i>B.juncea</i> at flowering.	47
15.	Effect of various treatments of amendments and added metals on copper uptake in <i>B.juncea</i> at flowering.	48
16.	Effect of various treatments of amendments and added metals on nickel uptake in <i>B.juncea</i> at flowering.	49
17.	Effect of various treatments of amendments and added metals on drymatter yield of <i>B.campestris</i> at flowering.	50
18.	Effect of various treatments of amendments and added metals on zinc concentration in <i>B.campestris</i> at flowering.	51
19.	Effect of various treatments of amendments and added metals on copper concentration in <i>B.campestris</i> at flowering.	52
20.	Effect of various treatments of amendments and added metals on nickel concentration in <i>B.campestris</i> at flowering.	53
21.	Effect of various treatments of amendments and added metals on zinc uptake in <i>B.campestris</i> at flowering.	54
22.	Effect of various treatments of amendments and added metals on copper uptake in <i>B.campestris</i> at flowering.	55
23.	Effect of various treatments of amendments and added metals on nickel uptake in <i>B.campestris</i> at flowering.	56
24.	Effect of various treatments of amendments and added metals on drymatter yield of <i>B.carinata</i> at flowering.	57
25.	Effect of various treatments of amendments and added metals on zinc concentration in <i>B.carinata</i> at flowering.	58
26.	Effect of various treatments of amendments and added metals on copper concentration in <i>B.carinata</i> at flowering.	59
27.	Effect of various treatments of amendments and added metals on nickel concentration in <i>B.carinata</i> at flowering.	60
28.	Effect of various treatments of amendments and added metals on zinc uptake in <i>B.carinata</i> at flowering.	61
29.	Effect of various treatments of amendments and added metals on copper uptake in <i>B.carinata</i> at flowering.	62
30.	Effect of various treatments of amendments and added metals on nickel uptake in <i>B.carinata</i> at flowering.	63

31.	Effect of various treatments of amendments and added metals on drymatter yield of <i>B.napus</i> at flowering.	64
32.	Effect of various treatments of amendments and added metals on zinc concentration in <i>B.napus</i> at flowering.	65
33.	Effect of various treatments of amendments and added metals on copper concentration in <i>B. napus</i> at flowering.	66
34.	Effect of various treatments of amendments and added metals on nickel concentration in <i>B. napus</i> at flowering.	67
35.	Effect of various treatments of amendments and added metals on zinc uptake in <i>B. napus</i> at flowering.	68
36.	Effect of various treatments of amendments and added metals on copper uptake in <i>B. napus</i> at flowering.	69
37.	Effect of various treatments of amendments and added metals on nickel uptake in <i>B. napus</i> at flowering.	70
38.	Effect of various treatments of amendments and added metals on drymatter yield of <i>B.nigra</i> at flowering.	71
39.	Effect of various treatments of amendments and added metals on zinc concentration in <i>B. nigra</i> at flowering.	72
40.	Effect of various treatments of amendments and added metals on copper concentration in <i>B. nigra</i> at flowering.	73
41.	Effect of various treatments of amendments and added metals on nickel concentration in <i>B. nigra</i> at flowering.	74
42.	Effect of various treatments of amendments and added metals on zinc uptake in <i>B. nigra</i> at flowering.	75
43.	Effect of various treatments of amendments and added metals on copper uptake in <i>B. nigra</i> at flowering.	76
44.	Effect of various treatments of amendments and added metals on nickel uptake in <i>B. nigra</i> at flowering.	77
45.	Comparable study of drymatter yield (g pot^{-1}) in different <i>Brassica species</i> using different amendments.	78
46.	Comparable study of zinc concentration ($\mu\text{g g}^{-1}$) in different <i>Brassica species</i> using different amendments.	78
47.	Comparable study of copper concentration ($\mu\text{g g}^{-1}$) in different <i>Brassica species</i> using different amendments.	78
48.	Comparable study of nickel concentration ($\mu\text{g g}^{-1}$) in different <i>Brassica species</i> using different amendments.	78
49.	Comparable study of zinc uptake ($\mu\text{g pot}^{-1}$) in different <i>Brassica species</i> using different amendments.	78
50.	Comparable study of copper uptake ($\mu\text{g pot}^{-1}$) in different <i>Brassica species</i> using different amendments.	78
51.	Comparable study of nickel uptake ($\mu\text{g pot}^{-1}$) in different <i>Brassica species</i> using different amendments.	78
