Abstract xxi

CHAPTER 1 INTRODUCTION

1.1 General 1
1.2 Construction and demolition waste scenario 2
1.3 Utilization of recycled aggregate in concrete 3
1.4 Necessity for the present work 4
1.5 Research objectives 6
1.6 Research methodologies 7
1.7 Layout of the thesis 8

CHAPTER 2 LITERATURE REVIEW

2.1 Introduction 10
2.2 Utilization of C&D waste in concrete 11
2.3 Recycled aggregate concrete (RAC) 15
2.4 Processing techniques of RA used in RAC 24
2.5 Mixing approaches used in RAC 28
2.6 Conclusions from literature review 36
2.7 Summary 36
CHAPTER 3  PROCESSING TECHNIQUE AND MIXING APPROACHES

3.1 Processing technique used in the present study 38
3.2 Production process of processed recycled aggregate(PRA) 40
3.3 Mixing approaches adopted in the present study 44
3.4 Normal mixing approach (NMA) 45
3.5 Two-Stage mixing approaches (TSMAs) 46
3.6 Summary 52

CHAPTER 4  EXPERIMENTAL PLANNING AND TESTING

4.1 Materials used 54
   4.1.1 Cement and silica fume 54
   4.1.2 Aggregates (F.A, VCA, PRA) 54
   4.1.3 Superplasticizer and water 57
4.2 Mix proportion adopted in this work (M75-grade) 57
4.3 Casting and curing details of concrete specimens 58
4.4 Tests and Testing methods of concrete 58
   4.4.1 Workability 59
   4.4.2 Mechanical properties 59
      i) density, ii) strengths (compressive strength, flexural strength and split tensile strength), iii) modulus of elasticity, iv) ultra sonic pulse velocity
   4.4.3 Durability properties 59
      i) water absorption, ii) sorptivity, iii) rapid chloride permeability test (RCPT), iv) drying shrinkage and v) abrasion resistance
   4.4.4 Scanning electronic microscopy (SEM) 59
4.5 Summary 59
CHAPTER 5  INFLUENCE OF PROCESSING TECHNIQUE ON RAC

5.1  Introduction  60
5.2  Workability  60
5.3  Mechanical properties  62
       i) density, ii) strengths (compressive, flexural, split tensile), iii) modulus
       of elasticity and iv) ultra sonic pulse velocity
5.4  Durability properties  82
       i) water absorption, ii) sorptivity, iii) rapid chloride permeability
       test (RCPT), iv) drying shrinkage and v) abrasion resistance
5.5  Scanning electron microscopy (SEM)  91
5.6  Selection of most suitable processed recycled aggregate(PRA)  95
5.7  Conclusions  96

CHAPTER 6  INFLUENCE OF MIXING APPROACHES ON RAC

6.1  Introduction  97
6.2  Workability  98
6.3  Mechanical properties  99
       i) density, ii) strengths (compressive, flexural, split tensile), iii) modulus
       of elasticity and iv) ultra sonic pulse velocity
6.4  Durability properties  120
       i) water absorption, ii) sorptivity, iii) rapid chloride permeability
       test (RCPT), iv) drying shrinkage and v) abrasion resistance
6.5  Scanning electron microscopy (SEM)  128
6.6  Selection of most appropriate variant of two-stage mixing approach  137
6.7  Conclusions  140
# CHAPTER 7  CONCLUSIONS, RECOMMENDATIONS AND SCOPE OF FUTURE WORK
