Acknowledgements

To start with, I would like to thank the almighty for his blessings, which have empowered me to complete this study.

“Acharya Devo Bhavo”
These Sanskrit lyrics are an apt reflection of my feelings of respect and admiration towards my revered Guru and guide, Dr. Bharati V.Pathak, Reader, Department of Commerce, Gujarat University for the support and guidance she provided me in this endeavour. Her deep understanding of the research process enlightened me during the tenure of the study. She, from the beginning, set high standards for the quality of the work, which gave me a good insight into the world of research. At times, when the pressures of my sales job got too high, she guided me on managing the time aptly. These inputs are bound to help me in my future endeavour.

I am also thankful to Dr.K.S. Shastri, Som- Lalit Institute of Management Studies, Ahmedabad, Dr.Rasananda Panda, Associate Professor, IPMG, Gandhinagar, Dr.Mahendra Sharma, Director, VMPIM, Ganpat University, Mr.Bhikhesh Bhatt, Media Consultant, Ganpat University, TN Rao College, Rajkot, RP Bhalodia College, Rajkot and Mr.Chaitanya, Principal I/C, Christian College of Management Studies, Anand for their support during the primary research. I take the opportunity to thank the students for their unbiased response. I also take this opportunity to thank Dr.Hemant Trivedi, Professor, MICA, for his guidance on research methodology and thesis presentation. The continuous motivation by Mr. Mihir Bholey, Sr.Faculty, National Institute of Design, Ahmedabad kept my spirits up during the tenure of the thesis. The guidance of Dr.Hemant Tiwari, PSM department, VS Hospital, Ahmedabad, in the area of statistics, helped me befriend the tough subject.
I cannot forget to thank my friends, Mr. Bhargav Dave, Mr.Ashok Chandravadia and Ms.Kiran Solanki, for their motivation and support to me during the research work. I also thank my office colleagues and superiors for their support in completion of the study.

A project of this magnitude cannot be accomplished without the support of the family. I thank my parents, Mr. Prakash Trivedi, Mrs.Varsha Trivedi and elders for their wishes and blessings in this endeavour. I would like to specially thank, my wife, Mrs.Shilpa Trivedi, who played the role of a classroom monitor, when I lost concentration from the subject. This report was impossible without her support.

Jay Trivedi
Research Scholar
