Design, synthesis and pharmacological screening of some novel condensed pyrimidines as a potential histamine H₁-receptor antagonists

Contents

1) Introduction

1.1 Histamine 1

1.2 Distribution, biosynthesis, release of histamine and triple response 1

1.3 Histamine as a ligand of histamine H₁-receptor 6

1.4 Antihistamines : Histamine H₁-receptor antagonists 7

1.4.1 Brief account on development of histamine H₁-receptor antagonists 7

1.4.2 Physicochemical properties of histamine H₁-receptor antagonists

1.4.2.1 Lipophilicity 11

1.4.2.2 Steric requirements of histamine H₁-receptor antagonists 13

1.4.2.3 Side chain basicity 17

1.4.2.4 Putative pharmacophore of histamine H₁-receptor antagonist 19

1.5 Second generation histamine H₁-receptor antagonists 24

1.5.1 An overview of second generation histamine H₁-receptor antagonists 24

1.5.2 Biochemical basis of second generation antihistamines 33

1.5.3 Pharmacokinetics 34

1.5.3.1 Absorption 35

1.5.3.2 Distribution 36

1.5.3.3 Onset of action and duration 36

1.5.3.4 Metabolism and elimination 37
1.6 The structural factors involved in the adverse effects of histamine H1-receptor antagonists

1.6.1 Factors involved in the sedative adverse effects of histamine H1-receptor antagonists

- Sedation and blood brain barrier penetration
- Role of lipophilicity in brain penetration
- CNS and peripheral histamine H1 receptors
- Influence of ionization
- Hydrogen bonding capacity – Δ log P concept
- Serum protein binding and brain penetration
- Solvation energy and BBB penetration
- The P-glycoprotein transporter
- Other forces that influence brain penetration

1.6.2 Factors involved in the cardiac adverse effects of histamine H1-receptor antagonists

1.6.3 Factors involved in the anticholinergic adverse effects of histamine H1-receptor antagonists

1.7 The new generation (third generation) antihistamines

1.7.1 Levocetirizine
1.7.2 Desloratadine

1.8 Conclusions

2) Review of literature

2.1 Pyridopyrimidines
2.2 Biologically important pyridopyrimidines
2.3 Synthesis of pyrido(2,3-d)pyrimidines
3) **Aim of present work**

4) **Results and Discussion**
   4.1 Synthetic approach 103
   4.2 Physical and spectral characteristics 111
   4.3 Pharmacological screening 157

5) **Experimental**
   5.1 Pharmacological screening 181
   5.2 Chemical synthesis 185

6) **Summary** 259

7) **References** 262

8) **Paper and presentation** 316
