ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude to my guide Prof. Dr. (Miss) N.J. Chinoy, Professor and Head (Retd.), Department of Zoology and Director (Retd.), School of Sciences, Gujarat University, Ahmedabad, for her valuable guidance, encouragement and timely suggestions which enabled me to complete this piece of work. Thank you for the countless ways in which you make a significant difference.

I am thankful to Prof. Dr. (Miss) N.J. Chinoy, Former Professor and Head (Retd.), Department of Zoology and Director, School of Sciences and Prof. M.V. Rao, Present Head, Department of Zoology, for providing necessary facilities during the tenure of my work.

I would like to extend a very special thanks to Dr. (Mrs.) Divya Chandel, Lecturer, Department of Zoology, for her expert advice and invaluable comments.

I am also thankful to all the teaching and non-teaching staff of the department for their help.

I especially want to thank my seniors, Dr. Arti Sharma, Dr. Sunita Chawla, Dr. Dipti Mehta, Dr. Trupti Patel and Dr. Rafiq Memon for all their help and support.

I deeply acknowledge my colleagues Ms. Sreelata Nair, Ms. Kavita Tewari, Ms. Shruti Shah and all the volunteers (for in vitro studies) for their kind cooperation.

I thank Mr. K.R. Nambiar for his patience in typing and completing this work.
The word thanks become insufficient to extend my gratitude to my parents, brother and friends especially Ankur and Manish for their constant inspiration, love, affection and care in my academic career and my life.

Last but not the least, I wish to express my gratitude to the meek warriors, the laboratory mice, who were sacrificed at the alter of research, so that man may have a long and better life. This by no means exhausts the list of those whose cooperation, help and encouragement have given me reason to be deeply grateful.

JHALA DEVENDRA D.
