ACKNOWLEDGEMENT

First and foremost, I offer my deep sense of gratitude to my guide Dr. Sunil N. Trivedi, a sympathetic and principle-oriented person who has been solely responsible for my upliftment throughout this work. He has been a source of inspiration and knowledge all the way through my career. He has been instrumental in enhancing various life skills and an overall development of my personality. I am touched by his patience and fortitude whilst allowing me the room to work in my own way. I attribute this level of mastery to his encouragement and effort and without him this thesis would not have been accomplished.

I am extremely thankful to Dr. Pankaj M. Shah, Director, for his kind permission and for providing fabulous laboratory facilities at the institute. His ever granting attitude has enabled me to execute the present work. In numerous professional aspects, I have been aided and guided for many years by Dr. Shilin N. Shukla, Deputy Director, Research and Education, not only at various stages of this work but for all the aspects life, it would not have reached such a creative leave.

I would like to share the pride here with RGFL (Receptor & Growth Factor Laboratory) family. It has been a true privilege to be the part of such an excellent team. It has been a friendly and cheerful group of co-workers who has time and again supported me in regaining the confidence which ultimately created a new paradigm as this thesis. I am thankful to past and present RGFL family members and all the dissertation students for their help and support.

Well Begun is half done but without Apexa, it would not have possible to complete the work. My sincere and hearty thanks to her and I wish a best future. It was a true demonstration of shouldering responsibilities. Amupamaben, the data manager of RGFL family, whatever created was kept on record and that too up-to-date by her. She was a true source of management for me. For my daily work, Pankil and Shlesha have been always available. Their high level of integrity and intimacy smoothen this work. I am also thankful to Shantaben and
Jagdishbahi for their laboratory support, ultimate a miles journey also starts with a step, every step in this work, has been a witness to their contribution at the grand level. I thank my whole department which has provided supply and equipments, which I have needed to, produce and complete of my thesis.

I take an opportunity to express my love for my parents Shri Vatsalbhai Ramambhai Dave – a demand of perfection and that too with sheer strictness and Shrimati Divyaben Dave – a kind hearted nurturing stand. I acknowledge my elder brother Prof. Dr. Urmil Dave for providing numerous encouraging conversations in all the shapes of my life with his wife and my bhabhi Mrs. Swati Dave – a friend and a generous human being.

I am indebted to many countless contributions – the patients – for their wishes and blessings, without them this work would not have been possible. I wish them healthy and happy life. I express my deep affliction for the deceased during the tenure.

Many contributions are visible and many are not. I thank each one of them who have been a well wisher throughout my life. Last but not least, I thank GOD Almighty for giving me enough courage for successful completion of this work and providing me everything that I have ever thought of. I pray him to be as kind and generous in future as he has been all the way till now.

Ms. Neena V. Dave
