ACKNOWLEDGEMENTS

First and foremost, I wish to pay my homage and devote my emotions to “Lord Ganesha”, “The Wonderful Medical biotechnologist” of this lovely world without whose blessings this task would not have been accomplished. I bow my head in utter humility and complete dedication.

I bow my head with absolute respect and pleasantly convey my heartily thankfulness to my co-traveler and my research guide, most respectable Dr. Pratibha B. Desai, Director and Head, Department of Microbiology, Shree Ramkrishna Institute Of computer education and Applied Sciences, Surat, who continued to support my aspiration with lots of love and encouragement. I consider myself privileged to work under her generous guidance, because I got newer creative dimensions and positive attitude in my thinking and analyzing capacity, which helped me to make things simple but programmatic. I am always indebted to her. She constantly encouraged me to remain focused on achieving my goals.

I am thankful to my dearest husband Mr. Dhanji Rajani, Microcare Laboratory, Surat for granting me permission to work and for providing all the possible facilities for my Ph.D. degree. His constant support, care and moral boost always kept me encouraged in all the difficult situations. I am equally thankful to my daughter Jiya, whose unstopping flow of love helped me to reach the goal.

Who in this world can entirely and adequately thank the parents who have given us everything that we possess in this life? The life itself is their gift to us, therefore first and foremost I would like to thank my grandmother, whose kindness, love and blessings has brought me to this day.

I bow my head with utter respect and convey my pleasant regards to my most esteemed father in law Shri Popatbhai, my loving mother in law Smt. Savitaben and my father Shri Ravjibhai for giving me permission and chance to undertake this project and also for their blessings, constant support, courage and enthusiasm. I am also thankful to all my maternal and parental relatives for their constant help and moral support.

I wish to acknowledge the contribution of Mr. Kalpesh Thaker, Hiral Thaker, Alpa Bhishra, Nital Patel and Sunny Patel for their support during my work. I am also thankful to all staff members of Microbiology department, librarian and office staff of Shree Ramkrishna Institute Of computer education and Applied Sciences, Surat, for extending their help and cooperation.
Finally, my sincere acknowledgement and thanks to those who were directly or indirectly involved in the completion of my work. I wish to thank each of them from the bottom of my heart.

Smita D. rajani
