Acknowledgement

The task of the excellent teacher is to stimulate 'apparently ordinary' people to unusual efforts. The tough problem is not in identifying winners; it is in making winners out of ordinary people.

You made a winner out of an ordinary person like me sir. Thus a formal acknowledgment would hardly be sufficient to express my debt of gratitude to Prof. Dr. O. P. Saxena, my guide and formerly Head of Botany Department, Gujarat University for his constant encouragement and inspiration and invaluable advices throughout this study.

I express my gratitude to God for providing me with an opportunity and strength to make a place for myself in this world.

I am also thankful to Prof. Dr. Y. T. Jasrai, Head of Botany Department, Gujarat University for providing me various facilities in the Department. I am also grateful to Prof. Alka. V. Vyas, Prof. Archana. U. Mankad and Dr. Hitesh Solanki for providing hale and hearty atmosphere in the Department. I am also thankful to Dr. Himanshu Pandya for his timely words of encouragement.

I am heartily grateful to Dr. D.B.Desai, M.D. Navbharat Seeds Pvt. Ltd., Ahmedabad for providing me a rare opportunity to interact and conduct field trials at his research farm at Nadiad of the initial study along with his valuable guidance from time to time.

I am also grateful to Prof. Anil K. Gupta, IIM-Ahmedabad for being a great source of inspiration to me. I thank him for providing me the place to learn and grow as an individual and helping me in my research work. I am also grateful to Ms. Riya Sinha and all my friends at National Innovation Foundation with being supportive during the tenure of my research work.

I am also thankful to Dr. D. Hoisington, Head Global Technologies, ICRISAT and Dr. Rajeev Varshney, Sr. Scientist, ICRISAT for providing me with laboratory facilities and guidance free of cost in conducting my molecular studies at ICRISAT, Hyderabad. I acknowledge the help of Sardar Krushinagar Agricultural University, Dantiwada, Gujarat for providing me with seeds of hybrids and parents as and when required.

Words fail me to express my gratitude to my Nanaji Mr. S. C. Naik for providing me with his field for conducting final field trials and thus providing me all the moral support required for the work.
I am thankful to my seniors and friend, Dhaval Vyas, for his encouragement and moral support, Dr. Monika Christian for encouraging me throughout the work and Dr. Chitra Shukla for always helping in experimentation and giving suggestion and support during my whole research work at the time when I needed it the most.

I would like to thank my colleagues and friends, Manjari Mehta for her honest support, help and courage during experiment, and Zankhana Rathod and Santhosh Singh for their cooperation during my work. I would like to thank my juniors, Abha, Anamika and Kalpesh for their support and keeping healthy, helpful and enthusiastic atmosphere.

No words would be enough to express the help and support given by my parents Mr. Arun Bhatt and Mrs. Chetna Bhatt during the whole tenure of my research work. Only a mother can be such a person to standby by you in thick and thin and boosting your morale. My sister Ami has been a great help to me in the making of this thesis by helping me in formatting of the thesis.

I owe special words of thanks to my dear husband Mr. Harish Desai, for his motivation, encouragement, patience, love and suggestions with his strong desire to complete this work, which raised my morale and the task of compiling my treatise easier for me. Moreover I am especially thankful to my mother- in- law Mrs. Kalpana Desai who gave me all the freedom in completing my work in time. I am also thankful to my father- in-law Mr. Bankimchandra Desai for his word of encouragement. Moreover am thankful to all my family members who have directly or indirectly helped me in completing my work in time.

Lastly I thank all those who have been direct or indirect help throughout the tenure of my work.

The expertise in this treatise belongs to those listed above. Any errors are mine.
