Acknowledgement

The formal acknowledgement will hardly suffice in eulogising my deep sense of gratitude to my venerated teacher Dr. O.P. Saxena, Reader, Department of Botany, Gujarat University, Ahmedabad, for the inveterate and erudite guidance right from 'conception to completion' of this investigation. Without his keen interest, constructive criticism and salubrious inspiration, this thesis would not have taken the present shape.

I offer my sincere and heart-felt thanks to Dr. C. K. Shah, Former Head and Dr. A.B. Vora, Head, Department of Botany for providing all the necessary facilities for my research work.

I shall ever be grateful to Dr. Khem Singh Gill, Vice Chancellor, Punjab Agricultural University (PAU) for his help in procuring the seed materials required for the experiments. My grateful thanks are also due to Dr. G.S. Nanda (Sr. Wheat Breeder) and Dr. V.K. Saxena (Sr. Maize Breeder) of P.A.U., Ludhiana; Dr. J.G. Bhowal (Sr. Geneticist) and Dr. Joginder Singh (Co-ordinator, All India Maize Improvement Project) of I.A.R.I., New Delhi; Dr. D.S. Brar (Cytogeneticist, I.R.R.I, Phillipines) and Dr. V.G. Gawai (Director, Regional Fodder and Forage Research Station, Gandhinagar, Gujarat) for supplying the seeds and for their valuable suggestions from time to time.

Indeed, the words at my command are inadequate to express my earnest and sincere thanks to Dr. Gurdev Singh, Professor, Indian Institute of Management (IIM), Ahmedabad, for his kind help in statistical analysis of the research data and for the courtesy extended to me for the use of Personal Computer as and when required. His constant encouragement and enthusiastic impetus generated me to bring out this endeavour in the present form.

I feel it a proud privilege to extend my thanks to all my colleagues, friends and well-wishers of whom special thanks are due to Dr. (Mrs.) Gita Singh, Dr. T. Pakeeraiah, Dr. D.V.N. Prasad, Dr. (Mrs.) P.K. Garg, Dr. (Mrs.) Neena Pandey, Dr. (Mrs.) Ashma Malhotra, Dr. (Mrs.) Neeta Thanki, Dr. (Mrs.) Vibha Mehra, Dr. D.K. Srivastava, Dr. M.P. Reddy, Dr. D.J. Mohan and Dr. Radhakrishna for their kindness and generosity bestowed on me from time to time.

I also feel gratified in acknowledging the valuable suggestions accorded during the computation work by my friends; Mr. Sham Prasad (System Analyst, Computer Centre, IIM, Ahmedabad), Mr. Kedarbhai (Programmer, Computer Centre, Gujarat University, Ahmedabad) and Departmental colleagues; Dr. Bharat Vyas and Dr. Ashvin Thanki. The cooperation and help rendered by Mr. V.G. Shah (Physical Research Laboratory, Ahmedabad) for S.E.M. work and Mr. Bankim Desai (Cancer Research Institute, Ahmedabad) for photography is also duly acknowledged.
I have no word to delineate the cooperation and painstaking help rendered by Mr. Deepinder Mohan (Director, Environmental Planning Group, Ahmedabad) and Mr. Saurabhan (Stenotypist, Institute of Plasma Research, Ahmedabad) while undertaking the strenuous job of computerised typing and printing out the manuscript.

I record my sincerest appreciation to Mrs. and Prof. Darshan Singh, Mrs. and Mr. B.S. Saini, Dr. (Mrs.) U.H. Acharya, Mrs. Surjeet Kaur and Mrs. Bimla Saxena for their overwhelming moral support and ever encouraging nature during my stay here.

Finally, my deepest reverence to my respected parents, elder sisters and brothers-in-law for their monumental moral support and also for their contribution in shaping my career. My debt is also heaviest to my wife, Major(Mrs.) Jasbir Kaur, for her colossal patience, devotion and for her forebearance of my neglect exercised during the last phase of this work. Though, I can not weigh my feelings with the words - for all that they have been doing for me, so assiduously, inspite of many family constraints, in pursuing this high realm of learning all these years, which is something inexpressible yet deep in my heart, they know better.

GURDEV SINGH
