The list of persons who have provided sage counsel is now far too long to record here, but I must offer special thanks to at least the following personalities who assisted me greatly in the successful completion of this thesis. My indebtedness and gratitude to many individuals who have helped shape this thesis cannot adequately be conveyed in few sentences.

I must record my immense indebtedness to my esteemed guide Prof. V P Bharadwaj, Director, School of Social Sciences, and Head, Department of Economics, Gujarat University, Ahmedabad, for his invigorating and inspiring guidance, valuable comments and suggestions from time to time.

Extremely useful and detailed suggestions for improving this thesis were received from Dr. S N Joshi, Former Senior Consultant, Agro-climatic Regional Planning Unit (ARPU), Planning Commission, Sardar Patel Institute of Economic & Social Research, Thaltej Hill, Ahmedabad.

No words of gratitude are enough for Mr. Y S Swaroop and Mr. Shiji A for providing cartograms and thereby adding life to it.

I seek an opportunity to express my immense love to my dearest father, Prof. B J Pandya, Lecturer in Statistics, St. Xaviers’ College, Ahmedabad, who provided me with the spiritual and intellectual inspiration to persevere under difficult circumstances, I can do no more than reaffirm my eternal devotion.

It indeed affords me immense pleasure in capturing this occasion to express my deep sense of gratitude to my loving mother Mrs. Venu Pandya who has always provided me all the necessary facilities and environment for my research work.

Last but not the least, I am greatly obliged to my sister Dr. (Mrs.) Hemal Pandya, Lecturer in Commerce (Statistics), S D School of Commerce, Gujarat University, Ahmedabad and Mr. Chetan Shah, Manager Accounts, Shree Additives (Pharma & Foods) Ltd., Ahmedabad, for helping me in every line of progress. They have always been there to help me to maintain a proper perspective on life and living and, through their own creative and artistic talents, to inspire me to think in original and sometimes conventional ways.

(Ms. Hetal Bharat Pandya)
