Figure 36 Distribution of chromosome number among 26 patients with hyperdiploidy.

Figure 37 FISH result using AML1-ETO DCDF probe showing OOOGG signal pattern which confirmed trisomy of chromosome 21.

Figure 38 Representative image for FISH result using AML1-ETO DCDF probe showing OOOGG signal pattern which confirmed trisomy of chromosome 8.

Figure 39 FISH result using PML-RARα DCDF probe showing OOOGG signal pattern which confirmed trisomy of chromosome 17.

Figure 40 Representative image for FISH result using AML1-ETO DCDF probe showing OOOGG signal pattern which confirmed trisomy of chromosome 8 and 21.

Figure 41 (A)-GTG banded metaphase plate showing 2n+[10]. (B)- Revised karyotype after M-FISH 51,XX,+5,+8,+12,+16,+21[10].

Figure 42 Distribution of chromosome number among 20 patients with hypodiploidy.

Figure 43 FISH result using tricolor-dual fusion- BCR-ABL probe showing GGO-Aqua signal pattern which indicated presence of only one chromosome 9.

Figure 44 Representative image (A)- Partial karyotype of t(9;22) translocation. (B)- FISH result using BCR-ABL DCDF probe showing OGFF signal pattern.

Figure 45 Representative images (A)- Partial karyotype of double Philadelphia chromosome. (B)- FISH result using BCR-ABL DCDF probe showing OGFFF signal pattern which indicates presence of double Philadelphia chromosome.

Figure 46 Representative image of FISH using BCR-ABL DCDF probe showing OGFF and OOOG mixed signal pattern.

Figure 47 FISH using BCR-ABL DCDF probe showing 06GF signal pattern which indicates deletion of ABL gene on der(9) chromosome.

Figure 48 Partial karyotype and FISH results images for recurrent abnormalities observed.

Figure 49 Frequency of chromosomes involved structural chromosomal abnormalities in 78 ALL patients.

Figure 50 (A)-GTG-banded karyotype showing 46,XY,del(1)(q),?del(q),?add(6)(q),?add11(q23) (arrow▲). (B)-M-FISH karyotypeshowing 46,XY,t(Y;3)(q?;q?),t(1;4;6;11)[q31;q27;q22;q23].

Figure 51 Metaphase FISH showing LSI 11q23 break apart probe result.

Figure 52 Results of WCP probes. (A)-Spectrum orange for chromosome 1 and spectrum green for chromosome 6. (B)- Spectrum orange for chromosome 6 and spectrum green for chromosome 11.

Figure 53 Ideogram showing four-way translocation.

Figure 54 GTG banded partial karyotype showing t(5;7)+10.

Figure 55 GTG banded partial karyotype showing t(6;19)(q16;p13)-21.

Figure 56 (A)-GTG banded partial karyotype showing der(2),r(2). (B)-WCP FISH for chromosome 2 (spectrum green) showing r(2). (C)- Invert DAPI image showing r(2) in spectrum green.

Figure 57 (A)- GTG banded partial karyotype showing ring chromosome 9. (B)- FISH result using BCR-ABL DCDF probe.
