An Appreciation

The true hallmark of a teacher is his ability to distinguish between a necessary and an unnecessary hypothesis. It is this quality which makes him capable of moulding a raw and incoherent student of science into a coherent and highly pragmatic researcher. It is my extreme good fortune to be associated with Dr. S. R. Dave, my research guide. His positive criticism, perseverance and tolerance to my idiosyncrasies has led my research work to this stage.

I shall always be grateful for his constant guidance which has given a new perspective to my career. I express my sincere thanks to him and his family, who never grudged the time he spared for me. In fact, Mrs. Smita Dave (his wife) was always there with her cheerful nature whenever things started going wrong.

I consider myself honoured to have been blessed with an opportunity to work with him. I thank Dr. S. G. Desai, former Head of our Department who provided me this opportunity and gave his permission to carry out my research using departmental facilities.

My sincere thanks to Dr. N. K. Yadav who extended his cooperation when he became the new Head of the Department. I am thankful to Dr. B. V. Patel, faculty member of our department for his kind assistance and suggestions which proved valuable for my work. I am also grateful to Dr. Minu Saraf, lecturer in our Department.

I grab this opportunity to express my heartfelt gratitude for my teachers, Mrs. N. M. Upadhyay, Shri P. M. Pandaya, Shri H. S. Sharma, Shri U. B. Bhatt, Mrs. J. D. Nayak and Mrs. G. Nagar for their support and encouragement throughout my work. My special thanks to Dr. R. S. Joshi, lecturer in Chemistry Department, Gujarat College, who planted the seeds of research in my young mind and nurtured it all along.

I am grateful to Gujarat Government for providing me the research scholarship for two years.

I am thankful to Dr. Upkar Singh, General Manager of Hindustan Antibiotics
Ltd., Pune, for providing me the spent mycelia.

It is a pleasure to show my gratitude to the nonteaching staff of our department, Bharatbhai, Parikhbhai, Khandubhai, Dharamsinhbhai, Kanjibhai and especially to Diptiben. She not only remembered all the formalities and reminded me to complete them in time but also became a true friend providing me the much needed companionship.

Thanks are due to the former Ph. D. & M. Phil research staff, especially to Dr. Smruti Pandaya, Rupal Patwari, Preeti, Gopa, Reena, Jyuthika and Mr. P. S. Wakte.

Dr. Ajit Menon, who was my Ph. D. colleague has to be thanked specially. Without his invaluable help I think my work would have been delayed a lot. He proved the best senior one could hope for.

No words will suffice to profer a heartfelt gratitude towards my friends, Anupama, Devayani, Deepa, Sonia, Snehal and Vibha di for their amiable inspiration, perpetual encouragement and everwilling assistance through out my research tenure.

It is very difficult to express one’s gratitude towards their own. I don’t have any words to appreciate the efforts of my family. It was due to their constant persuasion and unstinted encouragement that I could finish my work. My unreserved thanks goes to Kavita, Anju and Sachin whose constant help enabled me to complete the work in time.

It would be a miss of me, if I do not acknowledge Mr. Nilesh Panvalkar of Sahyog Compugraphics who very zealously and skillfully prepared this manuscript.

Lastly, I thank all my well wishers who knowingly and unknowingly have helped in completing my thesis.
