List of Tables

Table-1.1: Terminology used in the North Indian ocean for different intensity of tropical cyclones.

Table-2.1: Details of the experiments conducted

Table-2.2: Summary of errors for the forecast initialized at different times.

Table-3.1: Experiments.

Table-4.1: A brief summary of various assimilation experiments.

Table-4.2: The summary of different initial conditions for Orissa Super cyclone

Table-4.3: The summary of different initial conditions for cyclone Gonu.

Table-5.1: Error statistics of the final GA Equations for 24-hour prediction

Table-5.2: Accuracy of landfall of MALA by various prediction systems

Table-5.3: Accuracy of landfall of AKASH by various prediction systems

Table-5.4: Accuracy of landfall of GONU by various prediction systems

Table-5.5: Accuracy of landfall of Cyclone Yemyin by various prediction systems

Table-5.6: Summary of Errors in track prediction made by different methods

Table-5.7: WRF integration time for 24 hour simulation

Table-5.8: Errors of 24 hour track prediction by different models.
