1 Introduction 1

1.1 Transdermal Drug Delivery System 2
  1.1.1 General 2
  1.1.2 Anatomy of skin 2
  1.1.3 Routes of penetration 5
  1.1.4 Benefits of TDDS 6
  1.1.5 Limitations of TDDS 6
  1.1.6 Factors affecting drug permeation 7
  1.1.7 Components of transdermal drug delivery systems 9
  1.1.8 Techniques of permeation enhancement 12
    1.1.8.1 Mechanical methods 12
    1.1.8.2 Carriers/ Vehicles 13
    1.1.8.3 Miscellaneous techniques 15

1.2 Ethosomes 17
  1.2.1 Introduction 17
  1.2.2 Advantages 19
  1.2.3 Disadvantages 20
  1.2.4 Ethosome: Structure and composition 20
  1.2.5 Characterization of ethosome 23
    1.2.5.1 Physical properties 23
    1.2.5.2 Chemical properties 29

1.3 Gel 32
  1.3.1 Introduction 32
  1.3.2 Classification of hydrogels 33
  1.3.3 Preparation of hydrogels 33
# 1.3.4 Design criteria for hydrogels

# 1.3.5 Application of hydrogels

## 1.4 Drug Profile

- **1.4.1 Felodipine**
- **1.4.2 Ropinirole HCl**

## 1.5 Excipients Profile

- **1.5.1 Lecithin**
- **1.5.2 Alcohol**

## 2 Literature Review

## 3 Aim & Rationale of Study

- **3.1 Aim of Work**
  - **3.1.1 Rationale of Work**
- **3.2 Plan of work**

## 4 Experimental Work (Felodipine Formulation)

- **4.1 Experimental setup**
- **4.2 Spectroscopic analysis**
  - **4.2.1 Characterization of drug**
  - **4.2.2 Preparation of calibration curve of Felodipine in different media**
    - **4.2.2.1 Calibration curve in methanol**
    - **4.2.2.2 Calibration curve in PBS 7.4 containing 1% Tween 80 and methanol**
- **4.3 Drug excipients compatibility study**
- **4.4 Determination of permeability coefficient of Felodipine through rat skin**
- **4.5 Preparation of ethosomal suspension**
- **4.6 Optimization of ethosomal suspension**
  - **4.6.1 Entrapment Efficiency (%EE)**
  - **4.6.2 *In-vitro* drug release**
  - **4.6.3 Experimental Design**
  - **4.6.4 Kinetics modelling of drug dissolution profiles**
- **4.7 Preparation and evaluation of liposomal suspension**
4.8 Evaluation of ethosomal suspension
4.8.1 Assay
4.8.2 Photomicrography
4.8.3 Particle Size and Size Distribution
4.8.4 Zeta Potential
4.8.5 Transition Electron Microscopy
4.8.6 Skin retention study
4.8.7 Stability study

4.9 Preparation and evaluation of ethosomal gel
4.9.1 Preparation of ethosomal gel
4.9.2 Evaluation of ethosomal gel
4.9.2.1 Physical Appearance
4.9.2.2 pH
4.9.2.3 Content uniformity
4.9.2.4 Rheological Characterization
4.9.2.5 In-vitro drug release study
4.9.2.6 Skin retention study

4.10 In-vivo study of ethosomal gel
4.10.1 Preparation of calibration curve
4.10.2 Collection of plasma sample

5 Experimental Work (Ropinirole HCl Formulation)
5.1 Experimental setup
5.2 Spectroscopic analysis of drugs
5.2.1 Characterization of drug
5.2.2 Preparation of calibration curve of Ropinirole HCl in different media
5.3 Drug excipients compatibility study
5.4 Determination of permeability coefficient of Ropinirole HCl through rat skin
5.5 Preparation of ethosomal suspension
5.6 Optimization of ethosomal suspension
5.6.1 Entrapment Efficiency (%EE)
5.6.2 In-vitro drug release
6.4 Determination of permeability coefficient of Ropinirole HCl and Felodipine

6.5 Preparation of ethosome suspensions

6.6 Optimization of ethosome suspensions
6.6.1 Entrapment Efficiency (% EE)
6.6.2 *In-vitro* drug release
6.6.3 Determination of release kinetics of ethosomal suspensions
6.6.4 Selection of optimized batch
6.6.5 Data analysis of 3\(^2\) full factorial design

6.7 Evaluation of the optimized ethosome suspension batches
6.7.1 Assay
6.7.2 % entrapment efficiency (%EE)
6.7.3 *In-vitro* drug release (Q\(_{24}\))
6.7.4 Photomicrography
6.7.5 Transmission Electron Microscopy (TEM)
6.7.6 Particle Size and size distribution
6.7.7 Zeta Potential
6.7.8 Skin retention study
6.7.9 Stability study

6.8 Evaluation of liposomal suspensions
6.8.1 Photomicrography of liposomal suspensions
6.8.2 Entrapment efficiency (%EE)
6.8.3 *In-vitro* drug release (Q\(_{24}\))
6.8.4 Skin retention study

6.9 Evaluation of ethosomal gels
6.9.1 Physical appearance
6.9.2 pH
6.9.3 Content uniformity
6.9.4 Rheological characterization
6.9.5 *In-vitro* drug release study
6.9.6 Skin retention study
6.9.7 Stability study

6.10 *In-vivo* drug release study

6.10.1 Calculation of transdermal dose of the drugs for *in-vivo* study

6.10.1.1 Transdermal dose of Felodipine

6.10.1.2 Transdermal dose of Ropinirole HCl

6.10.2 Prediction of *in-vivo* release from *in-vitro* studies

6.10.3 Transdermal *in-vivo* release of drugs

6.10.3.1 *In-vivo* release of Felodipine from ethosomal gel

6.10.3.2 *In-vivo* release of Ropinirole HCl from ethosomal gel

6.10.3.3 Comparison of *in-vivo* data of Felodipine with oral data

6.10.3.4 Comparison of *in-vivo* data of Felodipine with predicted values

6.10.3.5 Comparison of *in-vivo* data of Ropinirole HCl with oral data

6.10.3.6 Comparison of *in-vivo* data of Ropinirole HCl with predicted values

7 Conclusion

Bibliography
List of tables

1.1 Examples of ethosomes as a drug carrier
1.2 Design criteria for hydrogels
1.3 Physical properties of Felodipine
1.4 Brief Pharmacokinetics of Felodipine
1.5 Physical properties of Ropinirole HCl
1.6 Brief Pharmacokinetics of Ropinirole HCl
1.7 Physical and chemical properties of lecithin
1.8 Stability and reactivity data of lecithin
4.1 List of materials and reagents
4.2 List of instruments and equipments
4.3 Variables and their levels
4.4 $3^2$ Full factorial design with transformed values
4.5 Formulation of ethosomal gel
5.1 List of materials and reagents
5.2 List of instruments and equipments
5.3 Variables and their levels
5.4 $3^2$ Full factorial design with transformed values
5.5 Formulation of ethosomal gel
6.1 Absorbance values for the calibration plot of Felodipine
6.2 Absorbance values for the calibration plot of Ropinirole HCl
6.3 Cumulative drug release (mg) from solutions for permeability study
6.4 Felodipine ethosomal gel batches
6.5 Ropinirole HCl ethosomal gel batches
6.6 % Entrapment Efficiency of ethosomal suspensions
6.7 In vitro drug release (Felodipine ethosomal suspension)
6.8 In vitro drug release (Ropinirole HCl ethosomal suspensions)
6.9 Kinetic modelling of Felodipine ethosomal suspensions
6.10 Kinetic modelling of Ropinirole HCl ethosomal suspensions
6.11 Composition, %EE and $Q_{24}$ data of optimized batches
6.12 Summary of multiple regression analysis for %EE of Felodipine
6.13 Residual output analysis of %EE of Felodipine
6.14 Summary of multiple regression analysis for Q_{24} of Felodipine
6.15 Residual output analysis of Q_{24} of Felodipine
6.16 Summary of multiple regression analysis for %EE of Ropinirole HCl
6.17 Residual output analysis of %EE of Ropinirole HCl
6.18 Summary of multiple regression analysis for Q_{24} of Ropinirole HCl
6.19 Residual output analysis of Q_{24} of Ropinirole HCl
6.20 Correlation between %EE and Q_{24}
6.21 Chemical stability of optimized ethosomal suspension
6.22 in-vitro drug release (Q_{24} in mg) of liposomal suspensions
6.23 Viscosity data (cp) of ethosomal gel
6.24 Comparative in-vitro release (Q_{24} in mg) of gels
6.25 Pharmacokinetic parameters of Felodipine and Ropinirole HCl
6.26 Predicted in-vivo plasma concentration of Felodipine ethosomal gel
6.27 Predicted in-vivo plasma concentration of Ropinirole HCl ethosomal gel
6.28 Plasma concentration (in-vivo) experimentally obtained compared with hypothetical plasma levels from oral route
6.29 Summary of pharmacokinetic parameters obtained (Felodipine)
6.30 Summary of pharmacokinetic parameters obtained (Ropinirole HCl)
List of figures

1.1 Structure of skin 4
1.2 Routes of penetration through skin 5
1.3 Structure of ethosome 17
1.4 Mechanism of skin permeation of ethosomes 18
1.5 Structure of phospholipid molecule 20
1.6 Behavior of PC in aqueous media 21
1.7 Bilayer and micellar structure formed by phospholipid and by detergents 22
6.1 IR spectrum of Felodipine 100
6.2 IR spectrum of Ropinirole HCl 101
6.3 UV spectrum of Felodipine in methanol 101
6.4 UV spectrum of lecithin in methanol (10 μg/ml) 102
6.5 Calibration plot of Felodipine in methanol 103
6.6 Calibration plot of Felodipine in PBS 7.4 containing 1% Tween 80 103
6.7 UV spectrum of 100 μg/ml of Ropinirole HCl in distilled water 104
6.8 Calibration curve of Ropinirole HCl in distilled water 105
6.9 Calibration curve of Ropinirole HCl in methanol 105
6.10 Calibration curve of Ropinirole HCl in PBS pH 7.4 106
6.11 DSC of Ropinirole HCl 106
6.12 DSC of Ropinirole HCl + lecithin 107
6.13 DSC of Felodipine 107
6.14 DSC of Felodipine + lecithin 108
6.15 Cumulative drug release (μg) from solutions for permeability study 109
6.16 In vitro drug release (Felodipine ethosome suspension) 115
6.17 In vitro drug release (Ropinirole HCl ethosome suspensions) 116
6.18 Contour plot of %EE Felodipine 120
6.19 Contour plot of %EE Felodipine (3D) 121
6.20 Contour plot of Q_{24} Felodipine 123
6.21 Contour plot of Q_{24} Felodipine (3D) 123
6.22 Contour plot of %EE Ropinirole HCl 125
6.23 Contour plot of %EE Ropinirole HCl (3D) 126
6.24 Contour plot of $Q_{24}$ Ropinirole HCl
6.25 Contour plot of $Q_{24}$ Ropinirole HCl (3D)
6.26 Effect of entrapment efficiency (%) on in-vitro release (mg)
6.27 Optimized ethosomal suspension of Ropinirole HCl at 400x
6.28 Optimized ethosomal suspension of Felodipine at 400x
6.29 TEM of optimized ethosomal suspension of Ropinirole HCl
6.30 TEM of ethosomal suspension of Felodipine
6.31 Particle size analysis by Malvern zetasizer (Ropinirole HCl suspension)
6.32 Particle size analysis by Malvern zetasizer (Felodipine suspension)
6.33 Zeta potential of optimized Ropinirole HCl ethosomal suspension
6.34 Zeta potential of optimized Felodipine ethosomal suspension
6.35 Ropinirole HCl liposomal suspension in Bi-ocular microscope at 100x
6.36 Felodipine liposomal suspension in Bi-ocular microscope at 400x
6.37 In-vitro drug release profile of liposomes
6.38 Rheological profile of ethosomal gels
6.39 Comparative in-vitro release ($Q_{24}$) of Felodipine gels
6.40 Comparative in-vitro release ($Q_{24}$) of Ropinirole HCl gels
6.41 Mass spectrum of Felodipine
6.42 Calibration curve for LCMS estimation of Felodipine in plasma
6.43 Chromatograms (a. to f.) of plasma samples containing Felodipine
6.44 Mass spectrum of Ropinirole HCl
6.45 Calibration curve for LCMS estimation of Ropinirole HCl in plasma
6.46 Chromatograms (a. to f.) of plasma samples containing Ropinirole HCl
6.47 Comparison of Felodipine plasma concentrations
6.48 Comparison of Ropinirole HCl plasma concentrations
