List of the figures

No. Title Page

Prologue
Figure-1 Role of reactive oxygen species (ROS) and antioxidant defense in human body 3
Figure-2 Role of Matrix Metalloproteinases in cancer 7

Introduction
Figure-3 Acquired capabilities of cancer 10
Figure-4 Total number of breast cancer cases at GCRI 12
Figure-5 Structure of breast 13
Figure-6 Types of breast tumors 14
Figure-7 Developmental steps of invasive ductal carcinoma 15
Figure-8 Oxidative stress in cancer 21
Figure-9 Summary of antioxidant defenses in human body 22
Figure-10 Domain structure of human hsp70 34
Figure-11 Role of MMPs in growth, invasion and metastasis 38
Figure-12 Domain structure of MMPs 41
Figure-13 The steps of metastatic cascade 45

Results
Figure-14 Comparison of RBC enzymatic antioxidants between controls and breast cancer patients 96
Figure-15 Comparison of plasma enzymatic antioxidants and oxidative stress related markers between controls and breast cancer patients 97
Figure-16 Comparison of plasma non-enzymatic antioxidants between controls and breast cancer patients 98
Figure-17 Comparison of plasma lipid profile levels between controls and breast cancer patients 99
Figure-18 ROC curve for comparison between controls and breast cancer patients 101
Figure-19 ROC curve for comparison between controls and breast cancer patients 102
Figure-20 Comparison of RBC enzymatic antioxidants between controls and patients with BBD 108
Figure-21 Comparison of levels of lipid profile parameters between controls and patients with BBD 109
Figure-22 Comparison of RBC enzymatic antioxidants between PT and CR 116
Figure-23 Comparison of plasma enzymatic antioxidants and oxidative stress related markers between PT and CR 117
Figure-24 Comparison of plasma non-enzymatic antioxidants between PT and CR 117
Figure-25 Comparison of plasma lipid profile parameters between PT and CR 118
Figure-26 Comparison of RBC enzymatic antioxidants between PT and NR 118
Comparison of plasma enzymatic antioxidants and oxidative stress related markers in PT and NR

Comparison of plasma non-enzymatic antioxidants between PT and NR

Comparison of plasma lipid profile between PT and NR

Representative blots for hsp70 expression in malignant and adjacent normal breast tissues

Representative Pattern for inducible form of hsp70

Mean levels of hsp70 in malignant and adjacent normal breast tissues.

Representative zymograms for MMP-2 (a) and MMP-9 (b) standards

Representative gelatin zymogram of breast tissue samples

Comparison of pro MMP-2, active MMP-2, total MMP-2 and activation ratio MMP-2 in malignant and adjacent normal breast tissues

Comparison of pro MMP-9, active MMP-9, total MMP-9 and activation ratio of MMP-9 in malignant and adjacent normal breast tissues

ROC curve for pro MMP-2, active MMP-2 and active MMP-9 between malignant and adjacent normal tissues

Comparison of pro and active forms of MMP-2 and MMP-9 in malignant and adjacent normal breast tissues (Paired 't' test)

Activation ratio of MMP-2 and MMP-9 in malignant tissue with and without lymph node (LN) metastasis

Plasma MMP-2, MMP-9, TIMP-1 and TIMP-2 levels in the subjects

ROC curve for Plasma MMP-2, MMP-9, TIMP-1 and TIMP-2

Plasma MMP-2, MMP-9, TIMP-1 and TIMP-2 levels in PT and CR

Comparison of MMP-2, MMP-9, TIMP-1 and TIMP-2 levels between PT and CR (Paired 't' test)

Comparison of MMP-2, MMP-9, TIMP-1 and TIMP-2 levels between controls and CR

Representative pattern for alterations in plasma MMP-2, MMP-9 TIMP-1 and TIMP-2 levels in CR
