ACKNOWLEDGEMENT

Although ‘thanks’ is poor expression of the deep sense of gratitude one feels in the heart, yet there is no better way to express it.

First of all, my deep sense of gratitude goes to my guide Prof. S. K. Dewan, Department of Chemistry, M. D. University Rohtak, who monitored this research work from the beginning to the completion. He has been the source of inspiration and constant encouragement. I am greatly indebted to him for his creative suggestions and invaluable co-operation. I deem myself fortunate to work under his guidance and for providing me conductive atmosphere for my research work. He has always given great attention to my work and also moral support to me.

I acknowledge my sincere thanks to Prof. V. K. Sharma, Head, Department of Chemistry, M. D. University Rohtak and Prof. K. K. Verma, former Head of Department of Chemistry, M. D. University Rohtak, for their concrete suggestions at various stages and providing me research facilities.

I am also thankful to All the Teaching and Non-teaching Staff of Chemistry Department, M. D. University, Rohtak, for their valuable suggestions and guidance during this work.

I am very much thankful to my research-mates Dr. Minakshi, Rashmi, Anju and Sangeeta for their all time co-operations as well as to my friends Sonika and Naresh Kumar for their support in my hard time.

I would like to grab this opportunity to express my deep sense of gratitude to my family members for their love, constant inspiration and encouragement. Without their cooperation, I would never been successful in achieving this goal.

In addition, I am grateful to UGC, New Delhi for the financial help in the form of JRF and SRF during the course of this study.

Last but not the least, I am very much thankful to Almighty for providing me strength in my tough times and to all who contributed and helped me during the research period.

Priti Sharma

Department of Chemistry,

M. D. University, Rohtak
