LIST OF FIGURES

1. 3.2.1. Map of the study site along with the state and the country 28
2. 3.2.2. Map of Sonitpur district showing the major locations 28
3. 3.5.1. Monthly average rainfall year wise in (mm) 29
4. 3.5.2. Monthly average maximum temperature year wise in (°C) 29
5. 6.1. Number of species based on habit 186
6. 7.1a. Food categories of wild edible plants 194

LIST OF TABLES

1. 4.1.1. Name of tribes and localities visited and major sources of their economy 32
2. 4.3. Plant species and their fresh parts taken for food value estimation 38
3. 6.1a. Status and percentages of occurrence of wild edible species 185
4. 6.1b. Number of dominant families, genera and species 186
5. 6.4. Documentation of exotic wild edible plants and its origin 188
6. 6.5. List of rare and endangered plants 189
7. 7. Utilization pattern of wild edible plants 192
8. 7.1a. Categories of wild edible plants used by local communities 194
9. 7.1b. Plant used in fish and meat curry 195
10. 7.2a. Plant used for dying 197
11. 7.2b. Plant used for stupefying fishes 198
12. 7.2c. Plant used in tanning 198
13. 7.2d. Ten dominant animal species eating wild edible plant parts 198
14. 7.3.1. Markets survey records of the area 200
15. 7.3.2. Market potential wild edible species 202
16. 7.4a. Ethnomedicinal uses of plant species 206
17. 7.4b. Plant parts used as ethnomedicine 208
18. 7.5. Food value percentages of plant samples 210
19. 8.3.1. Uses of species among different communities 220
20. 8.3.2. Plants and people involved in barter systems 221
21. 8.4. Plants species selected for cultivation and sustainable use.

LIST OF ILLUSTRATIONS

1. 5.1. A portion of branch with fruits of \textit{Spondias axillaris} 68
2. 5.2. Flowering twig of \textit{Smithia sensitiva} 73
3. 5.3. A portion of branch bearing fruits of \textit{Carallia brachiata} 80
4. 5.4. A flowering branch with fruit of \textit{Momordica charantia} 89
5. 5.5. Flowering twig of \textit{Evolvulus nummularius} 106
6. 5.6. Flowering twig of \textit{Justicia gendarussa} 114
7. 5.7. Flowering twig of \textit{Phyla nodiflora} 119
8. 5.8. A flowering branch of \textit{Leucas indica} 122
9. 5.9. A flowering twig with male spike of \textit{Piper sylvaticum} 140
10. 5.10. A branch portion bearing male cone showing male flower, female cone showing female flower and seed of \textit{Gnetum gnemon}. A-Male flower, B-Female flower and C-seed.
