</tbody>
</table>
The mean and SD values of high and low achievers on the personality trait factor E with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor E with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor F with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor F with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor G with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor G with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor H with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor H with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor I with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor I with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor J with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor J with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor Q1 with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor Q1 with respect to gender.
The mean and SD values of high and low achievers on the personality trait factor Q2 with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor Q2 with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor Q3 with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor Q3 with respect to gender.

The mean and SD values of high and low achievers on the personality trait factor Q4 with respect to gender.

The summary of two way ANOVA of high and low achievers on the personality trait factor Q4 with respect to gender.

The mean and SD values of high and low achievers on the family interaction pattern with respect to gender.

The summary of two way ANOVA of high and low achievers on the family interaction pattern with respect to gender.

The mean and SD values of high and low achievers on the reinforcement pattern with respect to gender.

The summary of two way ANOVA of high and low achievers on the reinforcement pattern with respect to gender.

The mean and SD values of high and low achievers on the social support system with respect to gender.

The summary of two way ANOVA of high and low achievers on the social support system with respect to gender.

The mean and SD values of high and low achievers on the role pattern with respect to gender.
The summary of two way ANOVA of high and low achievers on the role pattern with respect to gender.

The mean and SD values of high and low achievers on the communication pattern with respect to gender.

The summary of two way ANOVA of high and low achievers on the communication pattern with respect to gender.

The mean and SD values of high and low achievers on the cohesion with respect to gender.

The summary of two way ANOVA of high and low achievers on the cohesion with respect to gender.

The mean and SD values of high and low achievers on the leadership pattern with respect to gender.

The summary of two way ANOVA of high and low achievers on the leadership pattern with respect to gender.

The mean and SD values of high and low achievers on the academic achievement motivation with respect to gender.

The summary of two way ANOVA of high and low achievers on the academic achievement motivation with respect to gender.

The mean and SD values of high and low achievers on the study habits with respect to gender.

The summary of two way ANOVA of high and low achievers on the study habits with respect to gender.

The mean and SD values of high and low achievers on budgeting time with respect to gender.

The summary of two way ANOVA of high and low achievers on budgeting time with respect to gender.
The mean and SD values of high and low achievers on the physical condition with respect to gender.

The summary of two way ANOVA of high and low achievers on the physical condition with respect to gender.

The mean and SD values of high and low achievers on the reading ability with respect to gender.

The summary of two way ANOVA of high and low achievers on the reading ability with respect to gender.

The mean and SD values of high and low achievers on the note taking style with respect to gender.

The summary of two way ANOVA of high and low achievers on the note taking style with respect to gender.

The mean and SD values of high and low achievers on the learning motivation with respect to gender.

The summary of two way ANOVA of high and low achievers on the learning motivation with respect to gender.

The mean and SD values of high and low achievers on memory with respect to gender.

The summary of two way ANOVA of high and low achievers on memory with respect to gender.

The mean and SD values of high and low achievers on the examination taking style with respect to gender.

The summary of two way ANOVA of high and low achievers on the examination taking style with respect to gender.
4:IV:9:A  The mean and SD values of high and low achievers on health with respect to gender.  224
4:IV:9:B  The summary of two way ANOVA of high and low achievers on health with respect to gender.  225
4:V:1:A  The mean and SD values of high and low achievers on the teacher effectiveness with respect to gender.  227
4:V:1:B  The summary of two way ANOVA of high and low achievers on the teacher effectiveness with respect to gender.  227
4:V:2:A  The mean and SD values of high and low achievers on the personal characteristics of the teacher with respect to gender.  229
4:V:2:B  The summary of two way ANOVA of high and low achievers on the personal characteristics of the teacher with respect to gender.  229
4:V:3:A  The mean and SD values of high and low achievers on the professional characteristics of the teacher with respect to gender.  230
4:V:3:B  The summary of two way ANOVA of high and low achievers on the professional characteristics of the teacher with respect to gender.  231
4:V:4:A  The mean and SD values of high and low achievers on the teacher student relationship with respect to gender.  232
4:V:4:B  The summary of two way ANOVA of high and low achievers on the teacher student relationship with respect to gender.  232
4:VI:1  The summary of the chi square values of socio demographic variables with regard to high and low achievers on class.  234
4:VII:1  The discriminant functions of the predictive variables  244
4:VII:2  The percentage analysis to establish the accuracy of prediction.  245
