CONTENTS 1
NOTATION 4

1 INTRODUCTION 6
  1.1 Background and Motivation 7
  1.2 Importance 15
  1.3 Literature survey 18
  1.4 Structure of work 22

2 2-PRIMAL RINGS 25
  2.1 Minimal prime ideals and Completely prime ideals 27
2.2 Automorphisms and Derivations ............................................. 30
2.3 $\sigma(*)$-rings and 2-primal rings ...................................... 31
2.4 Weak $\sigma$-rigid rings and $SI$-rings .................................. 34

3 ORE EXTENSIONS ........................................................................ 39
3.1 Prime ideals of Ore extensions .............................................. 41
3.2 Condition for a Noetherian ring to be a $\sigma(*)$-ring ............... 44
3.3 Condition for a Noetherian ring to be a Weak $\sigma$-rigid ring .... 47
3.4 Completely prime ideals of Ore extensions ............................ 48
3.5 Minimal prime ideals of Ore extensions ................................. 51
3.6 Associated prime ideals of Ore extensions ............................. 55

4 2-PRIMAL RINGS OVER ORE EXTENSIONS ............................ 58
4.1 Symmetric and Almost symmetric rings ................................. 59
4.2 $\delta$-rings over Ore extensions ............................................ 61
4.3 Prime radical of Ore extensions .......................................... 65
4.4 $SI$-rings over Ore extensions ............................................ 69
4.5 2-primal rings over Ore extensions ...................................... 72

5 2-PRIMAL RINGS OVER ORE EXTENSIONS OF ENDOMOR-
PHISM TYPE ........................................................................... 76
5.1 Radicals of Ore extensions of endomorphism type ................ 77
5.2 Minimal prime ideals of Ore extensions of endomorphism type . 80
5.3 Weak $\sigma$-rigid rings over Ore extensions of endomorphism type 81
5.4 $\sigma(*)$-rings over Ore extensions of endomorphism type ........ 82
5.5 $SI$-rings over Ore extensions of endomorphism type ............ 84
5.6 2-primal rings over Ore extensions of endomorphism type . . . . 85

6 CONCLUSION AND FUTURE WORK 87

Bibliography 90

Brief CV of Smarti Gosani 97
