ACKNOWLEDGEMENT

Every person in academic profession has principal but common goal of obtaining the degree of ‘Doctor of Philosophy’ (Ph.D) in his/her discipline. But to reach to this academic destination, I have experienced stress strain and undergone time consuming harculias work. After completing my research work, now I experience unmatched pleasure, satisfaction and proud in reaching to the towering hight of academic success.

During my critical period of research work, I have been guided, helped and encouraged by different sources. Therefore , it is my primary duty of acknowledging the help received from different sources.

The first priority in my life, is my parents. Their concern, care, encouragement and blessings have helped me to achieve this academic success. Alongwith my parents, all my family members have constantly provided me the strength and inspirations during the research work. So, I express my heart felt gratitude to all of them.
I must express my heartfelt gratitude to my esteem guide Dr. M.D. Mohite, Professor Emeritus of Dr. D.Y.Patil Institute of Management and Research and retired Dean, faculty of Commerce and Ex- incharge vice chancellor of M.S. University of Baroda, for his valuable guidance to complete this study. On several occasions of interactions on vexed research problems, his grass root understanding of problems, thought provoking suggestions and critical comments have contributed to improve the quality of my research output. My academic association with him convinced me that he is a living academic institution of excellence. It is my conviction that but for his valuable guidance, I would not have been able to complete this work in its present form. I am indeed extremely grateful to him.

I am thankful to Smt. Indrani Dey Assistant Chief Librarian, College of Agricultural Banking, Reserve Bank of India, Pune, for her help in providing ‘Statistical Tables Relating to Banks in India for the period of ten years i.e. 2000 – 2001 to 2009 – 2010.

For analysis of financial data, the ‘Ratio Analysis’, a benchmark tool is developed in financial management. But for analysis of
data of banks such readymade ‘Ratios’ for financial data analysis of banks are not available. In developing the core ‘Ratios’, Building Productivity Model, Profitability Model, AME Model, Expenditure Monitoring Model, and Statistical testing by using SPSS, I have received the help from Dr. Vikram Mohite, Professor of Finance of Nizwa University, Muscat, Oman. His expertised in Finance, Quantitative Finance, Specially, Financial Model Building, Statistics, econometrics and S.P.S.S. have placed my research output at an advance level and therefore, I sincerely thanks him.

I have received the help from Assistant Professor, Mrs. Manjiri Chavan of M.C.A. of Dr. D.Y. Patil Institute of Management and Research for taking extra care and untiring pains in designing and preparing the exhibits of mathematical models of my research. So, I express my thanks to her.

I am also highly indebted to the authors of books of banking, research scholars of various published articles in research journals and members of various banking committees of R.B.I.
During my research work, I had an opportunities to interact on issues of relevance with bankers, academicians, research scholars, accounting professionals, and financial analysts. Therefore, I acknowledge their helps I have received directly and indirectly. I express my deep sense of gratitude to them.

I appreciate the neat, careful and accurate computer typing in a timeframe and timely administrative assistance by Mrs. Manisha G. Pawar and by Mrs. Tejaswini Gopalakrishnan of office staff members of Dr. D.Y.Patil Institute of Management & Research.
