SEX-KNOWLEDGE QUESTIONNAIRE

Introductory

The word "sex" is a taboo in our refined society. Some people have developed a special hatred for the word who raise their brows on hearing it. But there are others who bring sex into their talk about each and everything. In literature, sex has been described elaborately, but in conversation even the educated people refrain from using words connected with sex.

On one side we remain attached to our old culture and ancient customs and on the other hand we are fast drifting toward the west due to speedy industrialization. In this transition, the need for sex education is increasing. But our society hesitates to accept it. What is the impact of sex education on the adjustment of school pupils? To know this some research is necessary. I hope you will cooperate with me in this research.

There are three inventories in this research which will be given to you one after another.

Mention what you feel about the word sex in your language. (Don't write your own name.)

1. Are you able to discuss the topic of sex?  
2. Do you feel that it is taboo to discuss sex?
3. Do you think that sex education in schools is necessary?

Adolescent boys and girls always have some queries. Sometimes they get information from a proper person in a proper manner, but sometimes they have to satisfy themselves with
books and magazines. As far as human sex knowledge is concerned, every growing child acquires it in one way or the other.

According to his/her age, every boy or girl should know certain things about his/her own body. There are some questions given below to judge how many facts you know about sex, so that it can be planned to give you more knowledge of sex, pupils of your own age should know.

PART I

Every question has four alternatives, only one of which is correct. Please make the sign of \(\checkmark\) on the number representing your answer on the given answer sheet. Please take care of the serial number of the question on the answersheet while you mark your answer.

PART I

Every question has four alternatives, only one of which is correct. Please make the sign of \(\checkmark\) on the number representing your answer on the given answer sheet. Please take care of the serial number of the question on the answersheet while you mark your answer.

1. Human reproduction is much like that of
   1. Snakes
   2. Birds
   3. Guinea pigs
   4. Fish

2. What is the name of the sex organ that is located in the male body?
   1. Testes
   2. Ovaries
   3. Uterus
   4. penis

3. What is the name of the sex organ that is located in the female body?
   1. Testes
   2. Ovaries
   3. Uterus
   4. penis

4. What is the name of the sex organ that is located at the end of the male reproductive system?
   1. Testes
   2. Ovaries
   3. Uterus
   4. penis
2. The pituitary, an endocrine gland necessary for growth and development, is located
   1. at the base of brain.  
   2. on the pancreas.  
   3. in the chest below the thymus.  
   4. in the abdomen.

2. Pituitary gland is necessary for growth and development.
   1. in the abdomen.  
   2. in the chest below the thymus.
   3. on the pancreas.

3. In order to produce a male, the egg of the female must unite with the male sperm which has
   1. X Chromosome  
   2. A B Chromosome  
   3. Y Chromosome  
   4. None of the above

4. If a mother is struck by a musical instrument during pregnancy, the child will...
   1. will be a musician  
   2. will go to heaven sooner  
   3. will have a birth mark  
   4. None of the above

5. A contraceptive is a device to prevent...
   1. sterility  
   2. conception  
   3. veneral disease  
   4. menopause

6. The human race may be biologically improved by...
   1. eugenics  
   2. eugenics  
   3. improving the environment  
   4. all of these
6. मानव बालि तेलकी युग्म से...द्वारा विभूतित हो सकता हैः
   1. भौतिकविधि
   2. औषधितिक
   3. बलात्र क्षुदार
   4. जन्म क्षमा

7. यदि विवाह के काल क्षणों के बाद में एक मुक्त विभूतित जोड़े द्वारा शिशु उत्पन्न न हो लेकिन कमी
   __________ में हो सकती हैः
   1. यौन
   2. मादा
   3. दोनों में से किसी एक
   4. युग्म में से किसी एक मात्राबिता

8. यदि विवाह के काल क्षणों के बाद में एक मुक्त विभूतित जोड़े द्वारा शिशु उत्पन्न न हो लेकिन कमी
   __________ में हो सकती हैः
   1. यौन
   2. मादा
   3. दोनों में से किसी एक
   4. युग्म में से किसी एक मात्राबिता

9. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

10. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

11. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

12. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

13. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

14. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

15. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

16. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

17. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

18. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

19. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.

20. An egg is fertilized when it unites with....
   1. a gene.
   2. a sperm.
   3. another egg.
   4. a chromosome.
10. In the human male, a fluid is added to the sperms from the....
1. bladder.
2. seminal vesicle.
3. scrotum.
4. adrenals.

11. In mother, fertilization of the egg usually takes place in the....
1. vagina.
2. uterus.
3. fallopian tube.
4. ovary.

12. Sexual self-stimulation is known as....
1. nocturnal emission.
2. ejaculation.
3. masturbation.
4. semination.

13. The human embryo gets its food through....
1. the placenta.
2. the fallopian tube.
3. cell division.
4. the abdocavity.

14. The human embryo gets its food through....
1. the placenta.
2. the fallopian tube.
15. The testes are...
1. the organs in which sperms are produced.
2. the organs in which ova are produced.

16. The umbilical cord connects the...
1. testis and the scrotum.
2. the placenta and the navel.

17. The periodic process in which lining of the uterus breaks down and is discharged is called...
1. menstruation.
2. ovulation.
3. menopause
4. emission.

18. Which is inherited?
1. Syphilis
2. Tuberculosis
3. Personality
4. None of these
19. The organ of human female in which eggs are produced is called
1. testes 3. ovary
2. uterus 4. umbilicus

20. The physical changes which usually take place in the boys and girls during high school age are caused by the internal secretions into the blood stream from the ...
1. prostate gland and the seminal vesicles, 3. testes or ovaries and the pituitary gland.
2. seminal vesicle and the larynx. 4. heart and blood.

21. Menstruation usually occurs about once in
1. 15 days 3. 28 days
2. 20 days 4. 35 days

22. Seminal emissions are ....
1. a sign that boy is having proper thought.
2. due to lack of self confidence.
3. a normal occurrence in boys.
4. a symptom of disease.

22. Seminal emissions are ....
23. Identical twins are alike......
   1. in sex only.
   2. in sex and other hereditary characteristics.

23. The sex of the child is determined by the ..... 
   1. nucleus of the egg.
   2. dominant genes.

24. Acquired characteristics....
   1. cannot be inherited.
   2. are transmitted by the gene.

25. The seminal vesicles are situated.......
   1. in the scrotum.
   2. near the bladder.
26. The size of the male sexual organs
1. is related to fertility,
2. contributes to marital adjustment.

27. The size of the male sexual organs
1. is related to degree of sexual satisfaction from sexual act.
2. is of no physical or physiological significance.

28. Approximately once in a month in the human female an egg cell ripens and leaves the ova. This process is called...
1. menstruation.
2. emission.
3. conception.
4. ovulation.

29. Unsafe period is the period when...
1. menstruation takes place.
2. there is chance for conception.
3. conception cannot take place.
4. there are chances of greater mental disorders.

30. Approximately once in a month in the human female an egg cell ripens and leaves the ova. This process is called...
1. menstruation.
2. emission.
3. conception.
4. ovulation.
30. Unsafe period is the period:....
1. in between two menstruation cycles.
2. in between two emissions.
3. in between two pregnancies.
4. None of the above.

30. अौनसी अवसर है या?
1. दो महिला हालों के बीच का
2. दो प्रेग्नेंसी के बीच का
3. दो गर्भवत्स्था के बीच का
4. उपरोक्त में से कोई नहीं।

31. Unsafe period can be diagnosed by the....
1. secretion from testicles.
2. jelly like secretion from the vagina.
3. ache in genitals.
4. None of the above.

31. अौनसी एवं चक्षण का संकेत शक्ति है?
1. धुंध के साथ
2. योगी से जैविक लगाया
3. भूखा-क्षुद्रा प्रकटि शक्ति
4. उपरोक्त में से कोई नहीं।

32. Menstruation most frequently begins between the ages of....
1. 15 and 18 years
2. 12 and 15 years
3. 9 and 11 years
4. 8 and 10 years

32. मासिक शुद्धि अौनसी है?
1. १५ व १८ वर्ष
2. १२ व १५ वर्ष
3. ९ व ११ वर्ष
4. ८ व १० वर्ष

33. The common feature of homosexuality is....
1. wandering about with arms around each other's waists.
2. having physical relations between the persons of the same sex.
3. both of the above.
4. cordial relation between two generations of the same sex.

33. सम्बन्धित के सामान्य शुद्धि है?
1. एक धुंध के करी इसे योगी कर चुगना
2. अपने रंज बाहु अपने शाक्ति के साथ धारितिक शुद्धि होना
3. सामान्य रक्षा की दो चीटियों के बीच में योगी पूरा सामान्य
4. भूखा-क्षुद्रा प्रकटि की दो चीटियों के बीच में सामान्य पूरा सामान्य
34. The Rh factor of blood may have an adverse effect on the fetus if...
1. blood of the mother is Rh negative and of the father Rh positive.
2. blood of the mother and the father are Rh negative.
3. blood of the father is Rh negative and the mother is Rh positive.
4. blood of both the parents are Rh positive.

34. When it is time for the baby to be born...
1. the muscles of the uterus begin to contract to force out the baby.
2. the vulva gradually opens to let the baby out.
3. the fallopian tube expands to permit the baby to pass.
4. the ovary enlarges.

36. During adolescence the rate of general growth and development is...
1. rapid.
2. slow and constant.
3. very slow.
4. stationary.

37. Which one of the following is more often the cause of impotence in the male and frigidity in the female?
1. emotional features
2. endocrine deficiency
3. disease
4. accident
38. Which one of the following statements about homosexuality is incorrect?
1. It is essentially a form of arrested development in the process of emotional maturity.
2. It is a trait that is inherited.
3. It is not based on some inborn lack of harmones.
4. Treatment is largely a matter of reeducation and reconditioning.

39. The prostate gland
1. is situated in the brain.
2. is of no use in the reproductive process.

40. Of the following causes of sterility in women, which is the most common?
1. Endocrine disturbance
2. The closing of the fallopian tube
3. Low basal metabolism.
4. Displacement of uterus.
40. How long does a woman continue to have menstrual periods?
1. For about 20 years after they begin.
2. Until she is about 48 years old.
3. Until she is about 60 years old.
4. As long as she lives.

41. Painful menstruation is:
1. A disease.
2. A normal occurrence that should be so regarded.
3. Never successfully treated by physicians.

42. Masturbation is a practice:
1. Which may lead to insanity.
2. One in which a very small percent of young men are engaged.
3. Over which a person cannot exercise control.
4. Which is not harmful.

43. Masturbation is a practice:
1. Which may lead to insanity.
2. One in which a very small percent of young men are engaged;
3. Over which a person cannot exercise control.
4. Which is not harmful.
44. Which of the following statements concerning fertility and sterility in the male are incorrect?

1. Sexual continence before marriage does not lead to sterility.

2. About 40 to 50 percent of all instances of sterile marriages may be attributed to the husband rather than to the wife.

3. There are many causes of sterility including defective sperm, poor health and severe diabetes etc.

4. The infantile male is usually lacking in virility.

45. Ovulation and menstruation usually occur...

1. simultaneously.

2. approximately 28 days apart.

3. within 24 to 45 hours.

4. approximately fourteen days apart.

46. Gradual decrease in the function of ovaries is the main characteristic of...

1. menarche

2. pregnancy

3. menopause

4. menstruation

47. The male sex hormone is...

1. estrogen.

2. androgen.

3. progesterone.

4. spermatozoon.
48. The first stage of labour is marked by......
1. dilation of the cervix.
2. the breaking of the amnion.
3. rhythmical contraction of the uterus.
4. the expulsion of the placenta.

49. In the second month of pregnancy the product of conception is called.....
1. a zygote.
2. an embryo.
3. an anomaly.
4. a fetus.

50. The positive sign of conception is.....
1. nausea in the morning;
2. stopping of menstruation.
3. the shadow of the fetus on x-ray film.
4. enlargement of the abdomen.

51. Pregnant women should have dental check ups and care if necessary.....
1. during the early months of pregnancy.
2. postponed until after the baby is born.
3. done during the last few months of pregnancy.
4. postponed because pregnancy weakens the teeth any way.

52. Pregnant women should have dental check ups and care if necessary.....
1. during the early months of pregnancy.
2. postponed until after the baby is born.
3. done during the last few months of pregnancy.
4. postponed because pregnancy weakens the teeth any way.
51. The disease which is most likely to have serious consequences if the mother contracts it during the early month of pregnancy is...
1. scarlet fever.
2. measles.
3. gonorrhea.
4. german measles.

52. A sudden Increase in weight and the presence of albumin in the urine are strong indications of...
1. multiple birth.
2. toxolemia.
3. miscarriage.
4. a need for blood transfusion.

53. The cause of the blue baby is that the...
1. blood doesn't flow properly from the heart to the lungs.
2. lungs don't have enough oxygen.
3. lungs give off too much oxygen for the body to assimilate.
4. mother's blood group is Rh positive and the father's Rh negative.
PART II

There are three figures given below, one of which is that of the male reproductive organs (figure I) and the remaining two are those of the female reproductive organs (figures II and III).

On the given answer-sheet, please write the names of the organs which are represented by numbers 1, 2, 3, .......10.

लि II

नीचे तीन आकृतियाँ दी गई हैं जिन में से एक नर जननाली (आकृति I) है और बाकी दो नारी जननाली (आकृति II और III) हैं।

विभाग-२

नीचे तीन आकृतियाँ दी गई हैं, जिन में से एक नर जननाली (आकृति I) और बाकी दो नारी जननाली (आकृति II और III) हैं।

आपेक्षिक उत्तरांतर्गत नंबर 1, 2, 3, .......10 को दर्शाने के लिए स्थानिक आकृतियाँ नाम करें।
PART III

Do you know appropriate words to communicate your ideas? We are interested in knowing how far boys/girls of your age can understand some facts about sex. You have to write the word, on the given answer sheet, which fits appropriately in the blank space in the statement. Please take care of the serial number on the answer sheet while replying.

शब्द मार्गर परोक्षण

क्या आपकी अपने बिचरों को प्रकट करते के लिए उचित शब्द आते हैं? हमारी यह जानने में सहाय रहे कि आप की तुम के बाहर/विद्वानों की वैदिक तथ्यों को बहुत तक समझ सकते हैं। आप के दिशा में उत्तर देने में यह शब्द महत्वपूर्ण है जो दिशा गरे तथ्य को लाम जगह में उचित रूप से बताता है। कृपया उत्तर देते समय उत्तर के क्रमांक का ध्यान रखिए।

निःशास्त्रीय ज्ञान कैसी?

तभी दिशा प्रकट करते ते में शायद शहीदी शब्दों आते हैं? तभी उत्तर में उत्तर देने में मदद करने के लिए आपकी भावनाओं के अनुसार। उत्तर आपसी तेजी का आधार काम करे?

1. The growing up period between childhood and adulthood is called........
   1. बालव्यावस्था से वयस्कता तक पुलिस के बीच का वित्तिकल कहलाता है।

2. Voluntary sexual intercourse of a married person with one of the opposite sex other than his or her spouse is called........
   2. विप्पल अपने प्रेमवास्ता स्थान से संबंधी को दूर करता है।

3. Removal of sex glands—testicles in man and ovaries in woman is called........
   3. हृदय पुनःचरों अभिन्न अपेक्षा बिचरों के लिए ज़बान संबंधी कहलाता है।

4. Disease or defect passed by mother to child before birth but not inherited is called........
   4. बीमारी या दोष, जो माता द्वारा दिया गया है तथा श्रेणी संबंधी आपसी कहलाता है।

5. Refrain from sexual relations is called........
   5. हृदय कर्मयुक्त संबंधी परिवर्तन कहलाता है।

6. The expulsion of male semen from the male urethra usually at the time of intercourse is called...
   6. पुरुषों ने मूत्रहल्मी द्वारा संबंधी हीं लेते संबंधी दृष्टि में नींदिमू है।
7. Tendency of indecent exposure of the genitals publicly which is a character of perverted mental condition is called...

8. The state of being capable of producing offsprings is called....

9. A highly infectious venereal disease transmuted chiefly through coitus, characterized by a discharge of pus from the reproductive organ is called.....

10. A physician specializing in the treatment of the problem of reproductive organs is called...

11. Surgical removal of the uterus either through the abdominal cavity wall or through vagina is called.....

12. Child being born to an unmarried mother is called.....

13. Sexual relation between close relatives such as father and daughter, mother and son or brother and sister is called.....

14. The form of perversion in which a human being derives pleasure from pain and humiliation is called.....

15. Excessive, self-love, sexual excitement through admiration of one’s own body is called.....
17. Morbid and uncontrollable sexual desire in women is called ___________.

18. A physician specializing in the case of women during pregnancy, labour, and period immediately following delivery is called ________.

19. Excessive emotional attachment involving conscious, or unconscious incestuous desire, of a son in his relation to mother is called ________.

20. Sexual deviation from normal is called ________.

21. The form of marriage in which one woman has more than one husband at the same time is called ________.

22. The presentation of sexually arousing material in literature, art, motion pictures, and other means of communication and expression is called ________.

23. The period during which boys and girls begin to develop and grow into men and women is called ________.

24. Physical or psychological condition in which an individual gets sexual pleasure from inflicting pain on others is called ________.

25. The interval of the menstrual cycle when the female is presumably not ovulating and so the period when the fertilization supposedly cannot occur is called ________.

21.
26. The physical characteristics other than the external sex-organs that distinguish male from female is called...

27. During a female (sometimes a male) into a sexual intercourse without the use of force is called...

28. Desire for sexual expression is called...

29. Any of the various ways by which sexual tension is released through orgasm is called...

30. A surgical procedure for sterilizing the male involving the removal of the vas deferens or a portion of it is called...

31. A contagious disease transmitted mainly by sexual intercourse with an infected person is called...

32. Any procedure (usually surgical) by which a male or female is made incapable of bearing children is called...

33. An infectious chronic venereal disease that enters the body through sexual contact and spreads through the blood stream in other parts of the body is called...

34. When a person has intercourse with many persons or has casual sexual relations is called...

27. During a female (sometimes a male) into a sexual intercourse without the use of force is called...

28. Desire for sexual expression is called...

29. Any of the various ways by which sexual tension is released through orgasm is called...

30. A surgical procedure for sterilizing the male involving the removal of the vas deference or a portion of it is called...

31. A contagious disease transmitted mainly by sexual intercourse with an infected person is called...

32. Any procedure (usually surgical) by which a male or female is made incapable of bearing children is called...

33. An infectious chronic venereal disease that enters the body through sexual contact and spreads through the blood stream in other parts of the body is called...

34. When a person has intercourse with many persons or has casual sexual relations is called...
