1.11 Collision Frequency
1.12 Diurnal Variation of Absorption
1.13 Seasonal Variation
1.14 Solar Cycle Variation
1.15 Frequency Dependence of Absorption
1.16 Latitudinal Distribution
1.17 Methods of Absorption Measurements
1.18 Absorption Measurements at Ahmedabad

Chapter II Equipment for Measurement of Ionospheric Absorption

2.0 Introduction
2.1 Master Clock and the Pulser
2.2 Transmitter
2.3 Receiver
2.4 Display and Recording System
2.5 Summary of Technical Specifications of the Equipment
  2.5.1 Transmitter
  2.5.2 Receiver
  2.5.3 Visual and Registration Units
2.6 Power Supply
2.7 Antenna System
2.8 Operational Sequence
2.9 Calculation of Absorption
Chapter - III  Diurnal, Seasonal and Solar Cycle Variations of Ionospheric Absorption of h.f. Radio Waves

3.0  Introduction
3.1  Diurnal Variation
3.2  Mean Diurnal Variation for Different Seasons
3.3  Dependence of Absorption on Solar Zenith Angle
3.4  Seasonal Variation of Absorption
3.5  Absorption and Solar Activity
3.6  Index n of $\cos \alpha$ from Seasonal Variation of Absorption
3.7  Seasonal Variation of Absorption free from Solar Activity
3.8  Seasonal Variation of Absorption at constant $\cos \alpha$ and zero sunspot number
3.9  Conclusions
3.10  Discussion

Chapter - IV  Short term Variation in Ionospheric Absorption

4.1  Introduction
4.2  Fluctuations in the Diurnal Variation of Absorptions due to Es.
4.3  Fluctuations in Absorption due to Solar Events.
4.4 Day-to-day Variation in Absorption
4.5 Statistics of Absorption Measured with E\textsubscript{SL} Reflection
4.6 Model Estimation of the Effect of Es on Absorption
4.7 Cos\textdegree index for the Diurnal Variation of D-region Absorption
4.8 X-ray Flux and Absorption
4.9 Magnetic Activity and Absorption
4.10 Concluding Remarks

Chapter V Ionospheric Absorption and Profiles

5.1 Introduction
5.2 Atmospheric Model
5.3 Collision Frequency
5.4 Ionizing Radiation Fluxes
5.5 Ion Production Rates for Different Solar Zenith Angles
5.6 Measurement of N-h Profiles
5.7 N-h profile construction
  5.7.1 Rocket and Partial Reflection data
  5.7.2 Ionosonde data
  5.7.3 Multifrequency Absorption data
5.8 Solar Zenith Angle dependence of Electron Density at different heights.
5.9 Effective Loss Rates
5.10 Summary
5.11 Concluding Remarks.
