ACKNOWLEDGEMENT

A sojourn of a rain-drop from the cloud to the ocean is always characterized by its momentum, direction and overcoming ups and downs. With perfected project in my hands, today I feel like a rain drop which merges in the mighty ocean of universal knowledge. For that, first of all, I bow to ‘Almighty- the ultimate and the absolute” and then expressed forum- mother nature for infusing in me the strength, sincerity and devotion to carry out the project.

An emotional sense of gratitude from the deepest layers of my heart flows to the lotus feet of my revered teacher and guide, Dr. D. D. Santani, Professor and Head, Dept. of Pharmacology, L.M. College of Pharmacy, Ahmedbad without whose tireless guidance and unceasing encouragement, my journey to find out something a new would not have been culminated timely, effectively and successfully. He is not only my mentor and task bearer but he passionately and affectionately nourished my task with a paternal attitude. His involvement with his originality has triggered and nourished my intellectual maturity that I will benefit from, for a long time to come.

I was extraordinarily fortunate in honing Dr. M. B. Shah, Senior Lecturer, Department of Pharmacognosy, L.M. College of Pharmacy Ahmedbad with me, for her advice, supervision, crucial contribution in evaluation and above all willingness to share the bright thoughts with me, which were very fruitful for shaping up my ideas and research. I was indeed privileged to have her besides me always, which inspired me to set my goal and to systematically achieve it.

I would also acknowledge the help and support extended by Dr. M.C Gohel, Principal, L.M. College of Pharmacy.

I will be failing in my duty if I fail to express my thanks to Mr. S. K. Shah, Assistant Professor, Department of Pharmacology, KBIPER for his keen and sustained interest and constant support. I could never have embarked and started pharmacological work without his collaboration.
It gives me immense pleasure to express my deep sense of gratitude towards Dr. S.S. Pandya, Principal, KBIPER and Dr. G. B. Shah, Professor and Head, Department of Pharmacology, KBIPER for availing the facilities and cooperation needed for this project.

I have also been benefited by the advice and guidance from Ms. N. S. Kapadia, Senior lecturer and Ms. B.K. Shah, Head, Dept. of Pharmacognosy, L.M. College of Pharmacy, Ahmedabad.

The excellent spirit of cooperation shown by my colleagues in particular Ms. S. U. Patel, Ms. B.H. Dhru and Mr. J.R. Baheti, was a heart worming experience. I was also benefited by outstanding help rendered by Mr. V.K. Parmar, Mr. M.H. Jani and Ms. Nisha Patel in the analytical and biostatistical interpretation of my data.

I gratefully acknowledge the help rendered by Mr. Avatar Singh, SAIF, Punjab University, for getting NMR data and Zydus Research Centre for MS data timely and effectively.

I must also acknowledge timely help received from Dr. C. N. Patel, Principal, S.S.P.C., Mahesana, Dr. Nirukta Acharya, Sai Krupa Pathology Lab., Kalol, Mr. Vaghela, Zydus Cadila and Dr. Mehul, VIP Diagnostics.

I would like to pass my special thanks to Vinod bhai, Mayaben, Brijeshbhai, Hemanthbhai, Girishbhai, Shridhar bhai, Mahesh and hari for untiring help rendered during the entire span of this work. I am also thankful to my students Dhaval, Purvesh and Jignesh (M. Pharm), Priti, Jaimini and Namrata.

Collective and individual acknowledgments are also owed to my colleagues at K.B.I.P.E.R., Gandhinagar and S.S.P.C., Mahesana whose present somehow perpetually refreshed, was helpful and memorable. Many thanks go in particular to Ms. P.K. Shelat, Ms. A.N. Lalvani, Ms. P.J. Mehta, Ms. P.T. Trivedi, Ms. P.A. Shah, Ms. L.A. Panchal, Dharitri and Hasumati for giving me such a pleasant time when working together with them since I knew them.

Where would I be without my family? Many thanks go in particular to Papaji, Mr. R.A. Acharya and mummyji for constant and unceasing encouragement support when I needed the most. I am
and will always remain extremely indebted to them for their support and all the pain they have taken for me to make me free from all social obligations without complaint during the entire span of thesis.

My parents deserve special mention for their inseparable support and prayers. My Father, Dr. M.B. Jani, in the first place is the person who put the fundament in my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother is the one who sincerely raised me with her caring and gentle love and showed more faith in me than could ever be justified by logical argument. I feel a deep sense of gratitude for my parents and grandma who formed part of my vision and taught me the good things that really matter in life. My sister Janki and brother Shivam always made me see things in perspective: this is just a thesis. Thanks to both of them for being supportive and caring siblings.

And how can I forget my beloved better half, Dr. Sanjeev Acharya, Assistant Professor, Department of Pharmacognosy, KBIPER who unceasingly channelized my energies by ever vigilant support to me. I would have been virtually 'life-less' without his help. He whole heartedly played his part of a caring, sharing and loving life partner with complete dedication even in his busy professional and social obligations. His support and persistent confidence in me, has taken the load off my shoulder completely during entire project. I am definitely short of words to express my gratefulness to him.

I would like to thank everybody, all my dear and near ones, who was important to the successful realization of thesis, as well as expressing my apology that I could not mention individually.

I would like to thank to the members of local CPCSCEA who had approved and permitted my project to work on animals and finally I do remember with due compassion those innocent speechless rats for their selfless sacrifice for my cause. I pray to god their souls to rest in peace.

Niyati M. Jani
