A journey is easier when we travel together. Interdependence is certainly more valuable than Independence in this type of research. This thesis is the result of 5 years of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my deep gratitude for all of them.

First of all, I would like to thanks almighty My Family for always being with me and blessing me with strength and endurance required for the smooth completion of this research work, in any obstacle of my path, wholehearted prayer made driven atmosphere around me and boosted my soul with strength.

I take this great opportunity to express my gratitude and indebtedness towards my esteemed guide Dr. Arjunsinh K. Rana, Head department of chemistry, Navjivan Science College, Dahod, (Gujarat University, Ahmedabad). His wide knowledge and logical way of thinking has been of great value for me. During these 5 years I have known them as sympathetic and principle centred person, I have short of words to thanks him for his unlimited patience, affection and motherly attitude towards me during my entire research work. With feeling of profound gratitude I can say that the credit of this work goes to a great personality in his self. His overwhelming enthusiasm,
integral view on research and his mission of providing “only high quality work & not less” has made a deep impression on me. My feeling of respect for his is increasing day by day. I am fortunate to have such a nice person as my guide who made my research life smooth & rewarding for me.
