ACKNOWLEDGEMENT

First and foremost I wish to make devout supplication to Almighty, - “the great scientist of this lovely world” without whose blessings and benevolence my endeavors wouldn’t have reached to the zenith of success. My head bows with rapturous dedication from within my heart to the omnipotent lord.

This is the perfect moment for me to express gratitude and high regards for Late Dr. M. N. Desai for his moral support, inspiration and encouragement at the initial stage of my research work.

I find it very difficult to write something in short to acknowledge my research guide Dr.(Ms.) N. K. Shah, Professor, Chemistry Department, School of Sciences, Gujarat University, Ahmedabad-380009, whose continuous encouragement and devout earnest dedication to work have throughout been an everlasting source of inspiration to me. Her invaluable guidance and constructive criticism helped a lot to focus my views in proper perspective. I take this opportunity to express my intense reverence towards her for guiding me in the right direction throughout the course of this work. My deepest personal regards are due for her forever.

I would like to extend a special word of thanks to Dr. J. D. Talati, former Principal, Pilvai Arts, Commerce and Science College, Pilvai, whose constructive comments and apt guidance have helped me during the tenure of my studies.

It is my profound privilege to verbalize my feelings of gratitude and thanks to Dr. S. K. Menon, Head of Chemistry Department, and Director, School of Sciences, Gujarat University, Ahmedabad-380009, who have always been encouraging like a beacon with her kind words and deeds.

I would like to thank Dr. C.R. Vora, former Professor of Organic Chemistry, Chemistry Department, School of Sciences, Gujarat University, Ahmedabad – 380009, for his moral support.

I further take the opportunity to thank (Mrs.) Rekha Nair, Incharge Director, Post-Graduate Department of Computer Applications, National Institute of Co-operative Managements, Gandhinagar, for her help in my research work.

Had it not been for the constant and untiring help of my senior colleagues, Dr. G. V. Mudaliar, Dr. P. T. Trivedi and Dr. M. D. Shah, it would not have been possible for me to complete my research work. I extend my hearty thanks to them.
I am very thankful to my colleague and my best friend Mrs. Aesha Patel for her extensive help and moral support during my whole research work and also in preparing the thesis.

My special thanks are reserved for my colleagues, Dr. Dhaval Patel, Dr. Pankaj Kaswala, Dr. Dharmendra Patel, Mr. Vipul Buha, Dr. Shalini Chaturvedi, Mr. Dharmrajsinh Rana and Mrs. Unnati Naik who have prolifically helped me.

I am thankful to UGC – BSR for providing the financial assistance in the form of BSR Research Fellowship. I express my sincere thanks to CSMCRI – Bhavnagar for SEM analysis, and SAIF – Chennai for DSC graphs (Thermal Analysis).

I whole heartedly expressed my thanks to someone for whom words would fall short at present but feelings remain and who, I think do not require words but understand my feelings – my family whose continuous encouragement have been a source of inspiration and the only flame to my success.

Vidhi Ashokkumar Panchal
