CONTENTS

Chapter I — Introduction 1
❖ General Aspects of Corrosion 2
❖ Aim of the Research Work 5
❖ Synthesis and Characterization of Schiff bases 7
❖ References 21

Chapter II — Performance of Schiff Bases as Metallic Corrosion Inhibitors 24
❖ Classification of Inhibitors 25
❖ Organic compounds as corrosion inhibitors 32
❖ Effect of Functional Groups on Inhibitors 33
❖ Nitrogen containing Organic Inhibitors 33
❖ Structure of Organic Inhibitors and their Inhibitive Action 34
❖ Phenomenon of Adsorption 37
❖ Influence of Inhibitor Concentration on Corrosion Rate 42
❖ Effect of Inhibitors on Electrochemical Corrosion Process 44
❖ Thermodynamics and Corrosion Kinetics of the Inhibitors 49
❖ Effect of Temperature on Cathodic and Anodic Reactions 51
❖ References 54

Chapter III — Aluminium: Characteristic and Review 62
❖ Characteristic of Aluminium 63
❖ A Review of Corrosion Inhibitors for Aluminium in Acids 66
❖ References 83

Chapter IV — Experimental Methods, Results and Discussion 95
❖ Experimental methods 98
❖ Discussion of the results 102
❖ References 247

Chapter V — Summary of the Thesis 250
