ACKNOWLEDGEMENT

With much pride and delight I acknowledge my heartfelt sense of gratitude and indebtedness to Dr. C.H. Thaker (my guide), Reader, Dept. of Economics and Prof. V.P. Bharadwaj, Head, Dept. of Economics, School of Social Sciences, Gujarat University for their invaluable guidance, supervision and sustained encouragement. I place on record my deep sense of gratitude to Prof. V.P. Bharadwaj for his guidance on methodological issues, integrated conceptual synthesis, critical scrutinising of the manuscript of the thesis and constant help, moral and intellectual support. Prof. V.P. Bharadwaj and Dr. C.H. Thaker have spared most of their valuable time for discussions pertaining not only to this study but also the macro and micro perspectives and issues pertaining to energy-environment development interaction. In brief, without their kind help, sustained encouragement and guidance, this thesis could not have been completed.

I am extremely thankful to Prof. (Dr.) R.N. Vakil, Dean, and Prof. (Dr.) B.V. Doshi, Dean-Emeritus, Center for Environmental Planning and Technology, Ahmedabad for their constant encouragement, inspiration, support and cooperation. In fact, it is they who instilled in me the need of a passionate commitment to pursue this research programme.

This research attempt would not have been pursued and completed, without the kind cooperation and help extended by the Gujarat Chamber of Commerce and Industry, especially the continuous support and encouragement given by Shri I.N. Kania, Secretary, I place on record my gratitude to Mr. Kania who has personally written to several (selected) industrial units to provide valuable unit-level (micro level) data on energy, boiler replacement and related information.

I express my sincere thanks to innumerable individuals (of different industrial units right from Managing Directors to floor level personnel) who helped me to gather valuable unit level energy data which literally became the deciding factor in pursuing and completing this thesis.
I express my heartfelt thanks to Shri V.B. Savdasia, Director, Directorate of Economics and Statistics, Gujarat State (for providing me the district level Annual Survey of Industries data), Shri S. Ravi, Registrar of Companies, Gujarat Region (for allowing me to gather the energy cost data from the balance sheet record of different companies maintained by his office), Dr. R.C. Trivedi, Advisor, Energy and Pollution Control, Directorate of Industries (for helping me to gather energy resource allotment and consumption data on coal, lignite, petroleum products etc.), Shri V.M. Thakor, Sr. Manager (Commercial) Ahmedabad Electricity Company (for providing me the data on electricity consumption by industry and other sectors), Shri H.S. Duggal, IRS, Director Rail Movement, Industries, Mines and Energy Department, Govt. of Gujarat (for data on Coal and Lignite), Mr. S.C. Gupta, General Management, Indian Oil Corporation (for helping me to obtain data on industrial petroleum energy consumption), Mr. Saji Kumar, Energy Engineer, Encon Energy Consultants (for providing me the energy audit and combustion efficiency Experiment Data), Shri D.C. Gor, Chief Inspector of Boilers, Gujarat State (for data on boiler population and capacity), Shri N.K. Desai, Managing Director Laxmi Boilers and President, Indian Boiler Manufactures Association, Shri Gurumukh Singh, Chief Executive, Walia Engineering Associate Pvt. Ltd., Shri Shirish Karve, Area Manager, Thermax Ltd. (for their cooperation and help in obtaining data on boiler replacement).

I do acknowledge my gratefulness to Prof. T.R. Sarkari, Combustion and Fuel Efficiency Consultant, Prof. A.C. Shah, Chartered Engineer and Energy Conservation Consultant, Shri Vipul Shah, Consulting Energy Engineer, Shri J.A. Hirani, Energy Engineer, The Arvind Mills Ltd., Shri Devendra K. Soni, Consulting Energy Engineer, Shri Jagdish Chandran, Energy Economist, Energy Management Center, Minstry of Energy, Govt. of India, Shri U.S. Singh, Regional Director, National Productivity Council and Shri B. Ramachandran, Chief Regional Coordinator, Energy Conservation Task Force, Mr. Ratna Prabhu, Dy. Director, Ahmedabad Textile Industries Research Association, for the stimulating ideas I have got from them through discussions and consultations (and also helping me to clear my doubts about many technical issues and concepts related with boiler and combustion technology).
I am very much thankful to M/s. T.K. Roy, M. Krishna Kumar, R. Mahibalan, Dali Gopal and S. Sabu for their assistance I received at various stages of this study, especially during the computerisation of the data collected and documentation of the thesis.

I owe my heartfelt sense of gratitude to my late parents who were always been inspiring me to ladder ahead in the pursuit of knowledge, education and academic excellence.

I am specially thankful to my wife (Raji) and daughter (Raneeba), brothers and sisters, well-wishers and friends for their moral support and encouragement throughout this work.

Lastly, I thank AGM Computer Services especially Mr. Muralidharan K.N. for his excellent execution of the documentation work of this thesis.
