ACKNOWLEDGEMENTS

I am sincerely indebted to my beloved teacher and guide Prof. Dr.(Ms.) N.J. Chinoy for her visionary idea and its execution, which resulted in the form of this thesis. The explorative work of this study has been possible due to the veteran guidance and galaxy of ideas of the luminare, whose moral boosting, encouragement, helping nature, love and affection had made me familiar with this field of research, which is of prime concern to the human population, for which I humbly venerate her once again.

I am highly grateful to Dr. M.V. Rao, Reader, Department of Zoology, Gujarat University for all his help and suggestions eversince the initiation of this work. My special and personal thanks go to his family members for their everlasting love towards me.

I heartily extend my thanks to Shri H.V. Pandya, Lecturer, M.G. Science College, Ahmedabad and Shri Sharadkumar V. Sondarva, Lecturer, St. Xaviers College, for their help and suggestions during toil and moil and loving company and care throughout the period.

I express my deep and sincere feelings to Dr. Sr. Eveline Sequeira, Vice-Principal, St. Theresas College, Eluru, A.P. and Dr. Kirit J. D'Souza for their voluntarily help during the course of this work. I also make a note of help rendered by Dr. H.N. Highland, Lecturer, Department of Zoology, Gujarat University, to whom I extend my thanks.

I am thankful to all my colleagues Shri Michael Mathews, Ms. Harsha Joshi, Ms. Priya Padman, Shri Roy K. George and Shri V. V. Barot for their ready help. In a special way, I would like to express my sincere gratitude to Dr. U. Radhakrishna for his willing help and cooperation. I am also thankful to Dr. U.M. Rawal, Professor, Department of Zoology, Dr. N.K. Jain, Lecturer and Dr. Issac Thomas, Research Associate for their kind help in scanning the gels.

The award of Gujarat State Government Research Fellowship, Lady Tata Memorial Trust Junior Research Fellowship, Bombay and Senior Research Fellowship by Council of Scientific and Industrial Research (CSIR), New Delhi are highly acknowledged without which, it would have been a difficult task to carry out this piece of work.

I owe a great deal to Dr. R. Subramanian, Associate Professor, Jawaharlal Nehru University, New Delhi for his help during reference work as well as his constant encouragement, inspiration and valuable suggestions.

I acknowledge the help and cooperation rendered by Shri J.M. Barot, Joint Director, Gujarat Jalseva Training Institute (GJTI), Shri R.M. Purohit (GJTI), Shri Nanakkumar T. Santdasani (Engineer, Sewage and Water Supply Board, Sidhapur), Shri M.D. Kalele (Scientific Officer, Sewage and Water Supply Board, Palanpur) in visiting the fluoride endemic regions of Mehsana District, Gujarat, for collection of various samples. I also extend my thanks to Dr. D.J. Parikh, Dr. N.B. Ghodasara and Shri G.L. Pandya (NIOH) for fluoride analysis of the samples.
I take this opportunity to extend my thanks to all members of the Chinoy family for their everlasting good wishes and blessings which encouraged my research work.

I sincerely thank Fr. Dr. Vincent Braganza, Director, Loyola Research Centre, St. Xaviers College, Ahmedabad for his valuable suggestions and help at various stages of my work.

I heartily thank all my relatives for their encouragement and wishes throughout my career.

I specially extend my thanks to Shri V. Sharma, Mrs. Swati Rao, Ms. Jyothi, Mr. Babu and Mr. Srikanth for their everlasting good wishes which inspired my achievements.

My heartfelt thanks go to all my friends who always wished my success at every stage in my life.

My thanks are also due to our photographers Shri Somabhai Dholakia and Shri Prashant Dholakia. I warmly thank Shri Muralidharan for patiently typing the thesis.

Last but not least, I heartily thank my adoring parents, brother and sister-in-law for their prayers, love, affection, care and their blessings, without which I would not have reached this far.

M.V. NARAYANA
