ACKNOWLEDGEMENTS

First and foremost I would like to thank "the Almighty God". In the process of putting this thesis together I realized how true this gift of writing is for me. You have given me the power to believe in my passion and pursue my dreams. I could never have done this without the faith I have in you, the Almighty.

It cannot be argued with that the most influential person in my career has been my Guide, Dr. Mandava V. Rao, Prof and Head, Department of Zoology, School of Sciences, Gujarat University, Ahmedabad. His guidance and discipline have been indispensable to my growth as a research student and as a person over these past years. I am especially grateful to him for his devotion to his students’ education and success. I have not heard of another professor who goes so far out of his/her ways to make sure students are prepared for whatever the next step in their journeys may be. Without him, it would not have been possible for me to see this world with a correct scientific vision.

I would like to acknowledge and appreciate Dr. Divya Chandel, Dr. Devendra Jhala and other teaching staff for their valuable support towards the execution of my work. I cannot forget to appreciate how much our research associate has been helpful to me. Dr. Sunita Chawla cannot be forgotten at all for her sound technical advices. From my first days in research I have shared so many special moments, contributing to a common story whose colourful pages now lead me towards a new chapter. The warm support of all my senior colleagues who enabled me to complete this thesis and have a wonderful time along the way.

I am also indebted to M. Ravindra Babu and especially to Rajendra Bhatt for his interaction and comments, have influenced my approach to this research, as well as to daily life. His advice in drafting thesis directly contributed to this study. Many thanks to other research scholars, Swati Thakur, Gaurang Sindhav, Shahil Shah, Yasin Mansuri, Rashmi Chauhan, Ankita Shah and Hardik Dave whose friendship and support have
ACKNOWLEDGEMENTS

made it more than a temporary place of study. Their morning greetings mixed with advice and sense of humour about life provided me a moral support to complete this study. I heartily thank all the other research students of the Department for their help during my Ph.D journey.

I am also thankful to University Grant Commission (UGC), New Delhi for providing research fellowship to conduct this research work.

Zydus Cadila and Torrent Pharma rendered me with one of the most important need for my research i.e. animals for my experiments and investigations. It’s truly said that “someone’s gain is someone’s loss” & in vivo experiments could have never been possible without such animals. Hence I would not miss this opportunity to thank all innocent creatures (Wistar rats) who sacrificed their valuable lives being silent sufferer for successful completion of my research work.

I feel lack of words to express my appreciation to all my family members and my friends, My dada, dadi, Gaju kaka, kanji, Manish kaka, Kirti aunty, Raju kaka, Susmita aunty and all other who made my life blossom even in hard days and stood with me in all circumstances. I actually find difficult to give my heartfelt gratitude to my cousins, Dr. Divyada Vyas, my little Prachi and Hem for their encouraging words and moral support throughout my life. My friends kindled a spirit of optimism. Many thanks are to Gitiika Mishra, Bindu Soni, Shyama Shah and Rinku Patel.

Life without love is like an incomplete sentence & my sentence of life can never be completed without my brother Maharshi Vyas, My fiancé Jwalant Trivedi and My brother-in-law Aditya Trivedi. Their love, affection, faith and patience gave me an immense inspiration to never give up even at the most critical phases of my life. I really thank them from bottom of my heart for their complete support without which I was actually incomplete.
Last but not the least, I can never find words enough to thank the people who shaped me into who I am today. My parents Dhirendra Vyas and Mrs. Ranjan Vyas, as well as my in-laws Mr. Paresh Trivedi and Mrs. Bhavna Trivedi. Whose foresight and values paved the way for a privileged education, their patience, love and care has always given me the strength to work hard and to carry on in both good as well as difficult times of my life. I owe each and every accolade of my life to them. You have all contributed irreversibly to the person I have become.

Lastly, I would like to thank each and every element, person and thought who has directly or indirectly helped in developing my physical, mental and moral personality. Words will never be enough to thank you all for your support.
