## Table of Contents

### Chapter 1: Introduction and Requirement Analysis

1. **Introduction**
   - J2ME basics
     - Page 3
   - J2ME User interface
     - Page 3
   - J2ME Data management
     - Page 4
   - J2ME Personal Information Manager Profile
     - Page 4
   - J2ME Networking and Web Services
     - Page 4

2. **Project Requirement Analysis**
   - Page 6

### Chapter 2: Feasibility Analysis

3. **Background**
   - Page 8

   - Defining a Java Platform for Pervasive Devices
     - Page 10

4. **Architecture**
   - Page 13
Chapter 3: Software and Hardware Requirement

Software Requirement 66
Personal Profile 66
Additional APIs Available for Java ME 67
  API Groups 67
  Non Standard APIs 67
  Standard APIs 67
JTWI 68
Mobile Service Architecture 69
J2ME Mindmap 70
Portal: Tools and SDK

Hardware Requirement

Series 40 Platform

Series 40 Platform Overview
Series 40 1st Editions
Series 40 2nd Editions
Series 40 3rd Editions
Series 40 5th Editions
Java Application Developers
Flash Lite Developers
Media and Content developers
Screen Resolutions

Series 60 Platform

Overview
S60 Features
Form and its API with example 144
Item and its API with example 145
DateField with example 147
Gauge and its API 151
StringBuilder and its API 153
TextField and its API 153
Choice and ChoiceGroup and its API 155
Image and ImageItem their APIs with examples 157
More High-Level User Interfaces 163
List, its types and API with example 166
TextBox and its API 174
Alert and AlertType and its API with example 177
Ticker and its API 185
Low-Level User Interface 187
Canvas 187
Creating the Canvas with example 189
Coordinate system 190
Painting on the Canvas with example 192
Communication with Application Manager 196
Event Handling with example 197
Graphics 204
Obtaining a Graphics Object 205
Stroke Style with example 209

Drawing Lines 210

Drawing Arcs 210

Drawing Rectangles 211

Drawing Text with example 211

Drawing Images with example 219

Translating Coordinates 224

Clipping Regions with example 225

Chapter 5: Testing 230

Searching Techniques (Phone Book Codes Testing) 230

Searching with RecordFilter with complete example 230

RecordFilter API 232

Exception Handling 249

Invalid Record ID Exception 249

Record Store Exception 249

Record Store Full Exception 250

Record Store Not Found Exception 250

Record Store Not Open Exception 250

Catching Exception with example 251

Generic Connection FrameWork 253

Chapter 7: Enhancement

Enhancement

Securing J2ME/MIDP Applications 309
Java technology in Wireless Web Service 309
Security in Wireless Web Service 310
Guarantee data integrity using Digital Signatures 311
Handling the XML digital signature in MIDP applications 312
The Bouncy Castle Crypto APIs 313
Handling the digest 313
DSA signature example 314
An RSA signature example 318
Performance concerns 322
