Acknowledgement

In a work of this magnitude I was indeed fortunate to be the recipient of the unstinted support, guidance, suggestions, and advice from many of my teachers, senior colleagues, and friends. I recall with a tinge of sadness one of my earliest mentors, Dr. R. Satheesh, Reader, School of Environmental Sciences, M. G. University, who left us for his heavenly abode rather prematurely. His departure created a void in my academic career and I take solace in the continued moral support and affection from his beloved, Mrs. Geetha Kumari.

I am indebted in no small measure to my research guide Dr. A. A. Mohamed Hatha, an acknowledged authority in the field of Environmental & Marine Microbiology, for his tremendous support and inspiration in this odyssey. An erudite scholar and a gentleman to his very fingertips, he has nurtured me all these years in my quest for the ultimate goal.

I gratefully remember the wholehearted guidance and advice received from many stalwarts in the field of Environmental Science in M. G. University, notably Dr. A. P. Thomas, former Director, Dr. C. T. Aravinda Kumar, Director, members of the Faculty, Dr. E. V. Ramasamy, Dr. Annie Mathai, Dr. Usha Aravind, Dr. Mahesh Mohan and Dr. Sylas V.P.

Dr. B. Ajaykumar persuaded me to embark on a career in Environmental Science and was largely instrumental in my enrolling for a doctoral course in the subject.

Dr. Vijith H. is fondly remembered as a close associate and ever a friend in need, whose magnificent contributions in field work and GIS analysis in my study were immaculate.

Messrs. Salahuddin (Librarian), Santhosh (Lab Assistant), and Subhash (Field Assistant) were ever at hand in their respective fields of activity.

Mr. Johnykutty J. Ozhukayil played a prominent role in providing the requisite facilities for my field work in Nedumkandom. Messrs. Toms Augustine, Rinoy Varghese, Shiju Chacko, and Sreekanth were ready at hand during my field work, Dr. H. T. Harsha, Dr. Abhirosh Chandran, Dr. Mujeeb Rahman, Mrs. Jeewa S. Pillai, Mrs. Rejula, Abin Varghese, Manuel Thomas, and Dr. Maya George are remembered for their substantial contribution in the area related to the complicated procedures associated with the analysis of samples in the laboratory.
The significant roles played by each of my very intimate friends, particularly Messrs. Renjan Mathew Varghese, Jojo T. D., P. Baiju, John C. Mathew, Mrs. M. C. Rathi, Mrs. S. R. Sreeja Raj, Dr. Dhanya B., Mrs. Lakshmi E., Indu M. Nair, Dr. Rekha V. B., Jyothy S. and Aravind are unforgettable. Had it not been for their gentle, and at times not-too-gentle, persuasion and their affection and concern, it would not have been possible for me to bring this work to a successful conclusion so soon.

My colleagues in the Department of Environment and Climate Change in Thiruvananthapuram deserve special mention for their cooperation in this venture.

I place on record my grateful thanks to the University Grants Commission for the Senior Research Fellowship bestowed on me.

Finally, and most importantly, I affectionately remember my parents and relatives who rallied behind me and encouraged me in no small measure all the way from day one. My beloved wife Sowmy spent many a sleepless night poring over the draft, checking and rechecking the references and making the corrections and alterations wherever necessary and tolerated me throughout the ordeal. My dear daughter Devu contributed her mite.

I worshipfully remember the Almighty for showering upon me His blessings munificently throughout this long journey.

If I have left out the names of anybody, it is not by design. Please bear with me for any omissions.

Rejith P. G.
