List of Figures

Figure 1.1: Study Area-Location Map of Nedumkandam Panchayat ...........................................24
Figure 2.1: Air Quality Sampling Locations in Nedumkandam Panchayat .....................................47
Figure 2.2: Prevalence of Asthma in Nedumkandam Panchayat ....................................................52
Figure 2.3: Gender Variation in Prevalence of Asthma .................................................................52
Figure 2.4: Prevalence of Asthma Among Different Age Group ....................................................52
Figure 2.5: Prevalence of Symptoms among Asthmatic Respondents ..........................................52
Figure 2.6: Allergic Sensitivity among Asthmatic Respondents .....................................................53
Figure 2.7: Seasonal Influence among Symptomatic Respondents ..............................................53
Figure 2.8: Periodicity of Asthma attack among respondents in Nedumkandam panchayat .................56
Figure 2.9: Time of attack of Asthma Symptoms among respondents in Nedumkandam panchayat .................................................................56
Figure 2.10: Duration of Attack of Asthma Symptoms among respondents in Nedumkandam panchayat ...........................................................................................................56
Figure 2.11: Roofing in the Houses of Asthmatic Respondents in Nedumkandam panchayat ..............56
Figure 2.12: Flooring in the Houses of Asthmatic Respondents in Nedumkandam panchayat ....57
Figure 2.13: Economic Status of Asthmatic Patients in Nedumkandam panchayat ......................57
Figure 2.14: Spatial variation in the concentration of Oxides of Sulfur during the sampling period ..............................................................................................................60
Figure 2.15: Spatial variation in the concentration of Oxides of Nitrogen during the sampling period .........................................................................................................................60
Figure 2.16: Spatial variation in prevalence of fungal species at various sampling locations of Nedumkandam panchayat ..................................................................................71
Figure 2.17: Prevalence of various fungal species encountered in the study area ............................72
Figure 3.1: Water Sampling Locations in Nedumkandam Panchayat ..............................................104
Figure 3.2: Schematic diagram for determination Fecal Coliforms (FC) .........................................114
Figure 3.3: Schematic diagram for determination Fecal Streptococci (FS) .....................................115
Figure 3.4: Spatio-temporal variation of pH in surface water samples of Nedumkandam .................168
Figure 3.5: Spatio-temporal variation of hardness in surface water samples of Nedumkandam ..........................................................168
Figure 3.6: Spatio-temporal variation of chloride concentration in surface water samples of Nedumkandam ...........................................................................170
List of Figures

Figure 3.7: Spatio-temporal variation of nitrate concentration in surface water samples of Nedumkandam ................................................................. 171
Figure 3.8: Spatio-temporal variation of sulphate concentration in surface water samples of Nedumkandam ................................................................. 171
Figure 3.9: Spatio-temporal variation of phosphate concentration in surface water samples of Nedumkandam ................................................................. 172
Figure 3.10: Spatio-temporal variation of cadmium concentration in surface water samples of Nedumkandam ................................................................. 174
Figure 3.11: Spatio-temporal variation of lead concentration in surface water samples of Nedumkandam ................................................................. 174
Figure 3.12: Spatio-temporal variation of zinc concentration in surface water samples of Nedumkandam ................................................................. 175
Figure 3.13: Spatio-temporal variation of copper concentration in surface water samples of Nedumkandam ................................................................. 175
Figure 3.14: Spatio-temporal variation in number of Fecal Coliforms in surface water samples of Nedumkandam ................................................................. 176
Figure 3.15: Spatio-temporal variation in number of Fecal Streptococci in surface water samples of Nedumkandam ................................................................. 176
Figure 3.16: Spatio-temporal variation of pH in ground water samples of Nedumkandam ................................................................. 178
Figure 3.17: Spatio-temporal variation of hardness in ground water samples of Nedumkandam ................................................................. 179
Figure 3.18: Spatio-temporal variation of chloride concentration in ground water samples of Nedumkandam ................................................................. 179
Figure 3.19: Spatio-temporal variation of nitrate concentration in ground water samples of Nedumkandam ................................................................. 180
Figure 3.20: Spatio-temporal variation of sulphate concentration in ground water samples of Nedumkandam ................................................................. 180
Figure 3.21: Spatio-temporal variation of phosphate concentration in ground water samples of Nedumkandam ................................................................. 182
Figure 3.22: Spatio-temporal variation of cadmium concentration in ground water samples of Nedumkandam ................................................................. 182
Figure 3.23: Spatio-temporal variation of lead concentration in ground water samples of Nedumkandam ................................................................. 183
Figure 3.24: Spatio-temporal variation of zinc concentration in ground water samples of Nedumkandam ................................................................. 185
Figure 3.25: Spatio-temporal variation of copper concentration in ground water samples of Nedumkandam ................................................................. 186
Figure 3.26: Spatio-temporal variation in number of Fecal Coliforms in ground water samples of Nedumkandam ................................................................. 186
Figure 3.27: Spatio-temporal variation in number of Fecal Streptococci in ground water samples of Nedumkandam .................................................................187
Figure 3.28: GIS based evaluation of variation of pH in surface water samples of Nedumkandam .................................................................189
Figure 3.29: GIS based evaluation of variation of hardness in surface water samples of Nedumkandam .................................................................190
Figure 3.30: GIS based evaluation of variation of concentration of chloride in surface water samples of Nedumkandam .................................................................191
Figure 3.31: GIS based evaluation of variation of concentration of nitrate in surface water samples of Nedumkandam .................................................................192
Figure 3.32: GIS based evaluation of variation of concentration of sulphate in surface water samples of Nedumkandam .................................................................193
Figure 3.33: GIS based evaluation of variation of concentration of phosphate in surface water samples of Nedumkandam .................................................................195
Figure 3.34: GIS based evaluation of variation of concentration of cadmium in surface water samples of Nedumkandam .................................................................196
Figure 3.35: GIS based evaluation of variation of concentration of lead in surface water samples of Nedumkandam .................................................................197
Figure 3.36: GIS based evaluation of variation in concentration of zinc in surface water samples of Nedumkandam .................................................................198
Figure 3.37: GIS based evaluation of variation of concentration of copper in surface water samples of Nedumkandam .................................................................199
Figure 3.38: GIS based evaluation of variation in number of Fecal Coliforms in surface water samples of Nedumkandam .................................................................200
Figure 3.39: GIS based evaluation of variation in number of Fecal Streptococci in surface water samples of Nedumkandam .................................................................201
Figure 3.40: GIS based evaluation of variation in FC-FS ratio in surface water samples of Nedumkandam .................................................................202
Figure 3.41: GIS based evaluation of variation of pH in ground water samples of Nedumkandam .................................................................203
Figure 3.42: GIS based evaluation of variation of hardness in ground water samples of Nedumkandam .................................................................206
Figure 3.43: GIS based evaluation of variation in concentration of chloride in ground water samples of Nedumkandam .................................................................207
Figure 3.44: GIS based evaluation of variation in concentration of nitrate in ground water samples of Nedumkandam .................................................................208
Figure 3.45: GIS based evaluation of variation in concentration of sulphate in ground water samples of Nedumkandam .................................................................209
List of Figures

Figure 3.46: GIS based evaluation of variation in concentration of phosphate in ground water samples of Nedumkandam ................................................................. 210
Figure 3.47: GIS based evaluation of variation in concentration of cadmium in ground water samples of Nedumkandam ................................................................. 212
Figure 3.48: GIS based evaluation of variation in concentration of lead in ground water samples of Nedumkandam ................................................................. 213
Figure 3.49: GIS based evaluation of variation in concentration of zinc in ground water samples of Nedumkandam ................................................................. 214
Figure 3.50: GIS based evaluation of variation in concentration of copper in ground water samples of Nedumkandam ................................................................. 215
Figure 3.51: GIS based evaluation of variation in number of Fecal Coliforms in ground water samples of Nedumkandam ................................................................. 216
Figure 3.52: GIS based evaluation of variation in number of Fecal Streptococci in ground water samples of Nedumkandam ................................................................. 217
Figure 3.53: GIS based evaluation of variation in FC-FS ratio in ground water samples of Nedumkandam ................................................................. 218
Figure 4.1: Concept of Normalized Difference Vegetation Index ........................................... 261
Figure 4.2: Typical spectral reflectance curve for green foliage ........................................... 262
Figure 4.3: Schematic Diagram for Determination of Land Use/Land Cover Change ............... 270
Figure 4.4: Land use land cover of Nedumkandam during 1978 ........................................... 273
Figure 4.5: Land use land cover of Nedumkandam during 2012 ........................................... 274
Figure 4.6: Distribution of land use land cover during 1978 and 2012 in the study area .......... 279
Figure 4.7: Normalised Difference Vegetation Index of Nedumkandam during 1973 .......... 282
Figure 4.8: Normalised Difference Vegetation Index of Nedumkandam during 1990 .......... 283
Figure 4.9: Normalised Difference Vegetation Index of Nedumkandam during 2012 .......... 284
