List of Tables

Table 1.1  Rate of growth of employment in the organized sector ....................... 03
Table 1.2  Rate of growth of employment in the unorganized sector ..................... 04
Table 1.3  Cumulative number of SHG Bank linkage schemes in Kerala .................. 31
Table 1.4  Regional Categorization of Districts ............................................... 32
Table 1.5  Allocation of sample size in the selected districts ............................. 34
Table 2.1  Progress of SHG programme in India ............................................... 52
Table 2.2  Bank loan outstanding against SHGs in India (Cumulative) .................... 54
Table 2.3  Savings of SHGs with banks- Region-Wise (As on 31.03.2011) ............... 56
Table 2.4  Bank loan outstanding as on 31.03.2011 (Region-wise position) .......... 57
Table 2.5  Total Savings of SHGs with banks- Agency-wise (31.03.2011) ............. 58
Table 2.6  Bank loan outstanding against SHGs-Agency-wise (31.03.2011) ......... 58
Table 2.7  Performance of SHGs under SGSY ................................................. 61
Table 2.8  Growth of CDS and NHGs in Rural and Urban areas .......................... 70
Table 2.9  Thrift and loans distributed through the rural NHGs ......................... 72
Table 2.10  Thrift and loans distributed through the urban NHGs ....................... 73
Table 3.1  District-wise Starting year of SHG ................................................... 94
Table 3.2  District-wise membership of SHGs ................................................. 95
Table 3.3  District-wise places of residence of SHG members ........................... 96
Table 3.4  District-wise prior occupation of SHG leaders .................................. 97
Table 3.5  District-wise educational level of respondents .................................. 98
Table 3.6  Frequency Distribution of the activities undertaken by the SHGs ....... 99
Table 3.7  Mean Ranks for the Factors determining selection of activities ......... 100
Table 3.8  Test statistics (Friedman’s Test) .................................................... 100
Table 3.9  District-wise distribution of nature of economic activity .................... 102
Table 3.10 District-wise distribution of time spent for the enterprise ................. 103
Table 3.11 Nature of unit-wise distribution of time spent for enterprises .......... 104
Table 3.12 District-wise distribution of average monthly income from enterprises ......... 106
Table 3.13 Place of residence-wise monthly income level of respondents .......... 107
Table 3.14 District-wise distribution of bank category .................................... 108
Table 3.15 Place of residence-wise bank category ......................................... 109
Table 3.16 District-wise distribution of type of loan arrangement .................... 110
Table 3.17  Place of residence-wise type of loan arrangement ......................... 111
Table 3.18  District-wise amounts of loans from banks ................................ 111
Table 3.19  Place of residence-wise amount of loans from banks................. 112
Table 3.20  District-wise interest on loan .................................................... 113
Table 3.21  Place of residence-wise interest on loans .................................. 114
Table 3.22  District-wise value of fixed assets created ................................. 115
Table 3.23  Place of residence-wise value of fixed assets created ................. 116
Table 4.1  District-wise Distribution of Mean Scores Obtained for the Various Problems in finance ................................................................. 121
Table 4.2  Distribution of Mean Scores Obtained for the Various Problems in finance based on place of residence ........................................ 121
Table 4.3  General Linear Model on Multivariate Tests Based on Districts and Place of Residence .............................................................. 123
Table 4.4  Test of between-Subjects Effects on the Basis of District and Place of residence .................................................................................. 124
Table 4.5  District-wise Distribution of Mean Scores Obtained for the Various Problems in Finance .................................................................. 125
Table 4.6  Distribution of Mean Scores Obtained for the Various Problems in Finance Based on Prior Occupation ........................................ 126
Table 4.7  General Linear Model on Multivariate Tests Based on Districts and Prior occupation ........................................................................ 127
Table 4.8  Test of between-Subject Effects on the Basis of Districts and Prior occupation ..................................................................................... 128
Table 4.9  Summary Table Showing Group Statistics for Financial Problems .... 129
Table 4.10 Showing Results of One-way ANOVA .............................................. 130
Table 4.11 Tests of Equality of Group Means Based on Financial Problem ...... 133
Table 4.12 Table Showing Eigen Values Explained by the Function ............... 134
Table 4.13 Table showing Wilk’s Lambda to Test the Discriminant Function .... 134
Table 4.14 Classification Results of Discriminant Function .......................... 135
Table 4.15 Functions at Group Centroids ......................................................... 135
Table 4.16 Standardised Canonical Discriminant Function Coefficients ......... 136
Table 4.17 Structure Matrix ............................................................................. 137
Table 4.18 District-wise Distribution of Mean Scores Obtained for the Various Problems in production ...................................................... 138
Table 4.19 Distribution of Mean Scores Obtained for the Various Problems in production based on prior occupation ................................. 139
Table 4.20  General Linear Model on Multivariate Tests Based on Districts and Prior occupation ................................................................. 141
Table 4.21  Test of between-Subject Effects on the Basis of Districts and Prior occupation ................................................................. 142
Table 4.22  District-wise Distribution of Mean Scores Obtained for the Various Problems in Production ................................................................. 143
Table 4.23  Distribution of Mean Scores Obtained for the Various Problems in finance based on place of residence ................................................................. 144
Table 4.24  General Linear Model on Multivariate Tests Based on Districts and place of residence ................................................................. 145
Table 4.25  Test between Subject Effects on the Basis of Districts and place of residence ................................................................. 146
Table 4.26  Showing Group Statistics for Production Problems ................................................................. 147
Table 4.27  Results of One-way ANOVA ................................................................................................. 148
Table 4.28  Tests of Equality of Group Means Based on Production Problem ................................................................. 152
Table 4.29  Wilks' Lambda to Test the Validity of the Discriminant Function ................................................................. 153
Table 4.30  Table showing Classification Results for the Discriminant Function ................................................................. 154
Table 4.31  Functions at Group Centroids ................................................................................................. 154
Table 4.32  Standardized Canonical Discriminant Function Coefficients ................................................................. 155
Table 4.33  Structure Matrix ................................................................................................. 155
Table 4.34  Table showing communalities Extracted for the Evaluation of Agencies in Connection with Production ................................................................. 157
Table 4.35  Total Variance Explained on the Variables for the Evaluation of Agencies in Connection with Production ................................................................. 158
Table 4.36  Rotated Component Matrixes for the Evaluation of Agencies in Connection with Production ................................................................. 159
Table 4.37  Place of Residence-wise Estimated Marginal Means (Technology and Cost reduction) ................................................................. 162
Table 4.38  District -wise Estimated Marginal Means (Technology and Cost reduction) ................................................................. 162
Table 4.39  Two-way ANOVA (Technology and Cost reduction) ................................................................. 162
Table 4.40  Place of Residence-wise Estimated Marginal Means (Production Management) ................................................................. 163
Table 4.41  District -wise Estimated Marginal Means (Production Management) ................................................................. 164
Table 4.42  Two-way ANOVA (Production Management) ................................................................. 164
Table 4.44  Place of Residence-wise Estimated Marginal Means (Product safety) ................................................................. 165
Table 4.45  District-wise Estimated Marginal Means (Product safety) ............... 165
Table 4.46  Two-way ANOVA (Product safety) .............................................. 166
Table 4.47  Place of Residence-wise Estimated Marginal Means (Training) ......... 166
Table 4.48  District-wise Estimated Marginal Means (Training) ......................... 167
Table 4.49  Two-way ANOVA (Training) ............................................................. 167
Table 4.50  Place of Residence-wise Estimated Marginal Means (Subsidies and Product improvement) ...................................................... 168
Table 4.51  District-wise Estimated Marginal Means (Subsidies and Product improvement) ................................................................. 168
Table 4.52  Two-way ANOVA (Subsidies and Product improvement) .................. 169
Table 5.1  District-wise nature of market ............................................................. 174
Table 5.2  Place of residence-wise nature of market ............................................. 174
Table 5.3  Where sell the products (Place of residence-wise) ............................. 175
Table 5.4  Channels of distribution opted in the domestic market (Place of residence-wise) ................................................................. 176
Table 5.5  District-wise methods of transportation used ...................................... 177
Table 5.6  Place of residence-wise Methods of transportation used for the distribution of products ................................................................. 178
Table 5.7  Mean Ranks Obtained for Nature of Problems in Transportation .......... 179
Table 5.8  Test statistics (Friedman’s Test) .......................................................... 180
Table 5.9  Agency undertaking the marketing of the products (Place of residence-wise) ..................................................................................... 181
Table 5.10  Place of residence-wise No of sales people employed ........................ 182
Table 5.11  Mean Ranks Obtained for tasks assigned to sales people ................. 183
Table 5.12  Test Statistic (Friedman’s Test) ......................................................... 184
Table 5.13  Mean Ranks Obtained for Promotion Practices Followed by SHGs ................................................................. 186
Table 5.14  Test statistics (Friedman’s Test) .......................................................... 186
Table 5.15  Activity-wise Pricing method followed by SHGs ................................ 187
Table 5.16  Mean ranks for the Market factors influencing the price of products ..................................................................................... 188
Table 5.17  Test Statistic (Friedman’s Test) .......................................................... 189
Table 5.18  Activity-wise distribution of current price of the products ................. 190
Table 5.19  Mean Ranks for the source of information about the prices .............. 191
Table 5.20  Test Statistics (Friedman’s Test) .......................................................... 191
Table 5.21  District-wise distribution of mean scores obtained for the various problems in Marketing.......................................................... 193
Table 5.22  Distribution of means based on various activities undertaken ........... 194
Table 5.23  Multivariate Tests based on Districts and activities undertaken ........... 196
Table 5.24  Tests of Between-Subjects Effects on the basis of district and activities................................................................................................ 197
Table 5.25  Group Statistics for Marketing Problems ........................................................ 198
Table 5.26  Results of One-way ANOVA ................................................................. 199
Table 5.27  Tests of Equality of Group Means Based on the Problems in Marketing ............................................................................................. 203
Table 5.28  Table Showing Eigen Values Explained by the Function ...................... 204
Table 5.29  Table showing Wilk’s Lambda to Test the Discriminant Function ........... 204
Table 5.30  Classification Results of the Discriminant Function ............................ 205
Table 5.31  Functions at Group Centroids .............................................................. 205
Table 5.32  Standardised Canonical Discriminant Function Coefficients .............. 206
Table 5.33  Structure Matrix .................................................................................. 206
Table 5.34  Communalities Extracted for the Evaluation of Agencies in Connection with Marketing .............................................................. 208
Table 5.35  Total Variance Explained on the Variables for the Evaluation of Agencies in Connection with Marketing ............................................. 208
Table 5.36  Rotated Component Matrixes for the Evaluation of Agencies in Connection with Marketing ............................................................. 209
Table 5.37  Place of Residence-wise Estimated Marginal Means (Product Promotion) .......................................................................................... 212
Table 5.38  District-wise Estimated Marginal Means (Product Promotion) ............. 212
Table 5.39  Two-way ANOVA (Product Promotion) .............................................. 212
Table 5.40  Place of Residence-wise Estimated Marginal Means (Marketing Support) .................................................................................. 213
Table 5.41  District-wise Estimated Marginal Means (Marketing Support) .......... 213
Table 5.42  Two-way ANOVA (Marketing Support) ................................................ 214
Table 5.43  Place of Residence-wise Estimated Marginal Means (Market Research) .......................................................................................... 215
Table 5.44  District-wise Estimated Marginal Means (Market Research) ............. 215
Table 5.45  Two-way ANOVA (Market Research) ................................................... 215
Table 5.46  Place of Residence-wise Estimated Marginal Means (Assistance in Problem solving) .............................................................. 216
Table 5.47  District-wise Estimated Marginal Means (Problem solving) .............. 216
Table 5.48  Two-way ANOVA (Assistance in Problem solving) ......................... 217
Table 5.49  Place of Residence-wise Estimated Marginal Means (Pricing Strategy) ............................................................................................... 218
Table 5.50  District-wise Estimated Marginal Means (Pricing Strategy) ............... 218
Table 5.51  Two-way ANOVA (Pricing Strategy) .................................................. 218
Table 5.52  Place of Residence-wise Estimated Marginal Means (Export) .......... 219
Table 5.53  District-wise Estimated Marginal Means (Export) ............................ 219
Table 5.54  Two-way ANOVA (Export) ................................................................... 220
