ACKNOWLEDGMENTS

I am thankful to Dr. U.C. Mishra, Head, Air Monitoring Section, Division of Radiological Protection of Bhabha Atomic Research Centre, Bombay for his guidance and encouragement to carry out the work presented in this thesis. The interest shown by Dr. K.G. Vohra, Head, Division of Radiological Protection and Shri P. Gangadharan, Head, Radiation Protection Instrumentation Research and Development Section, during the course of the work is also acknowledged gratefully.

I am grateful to Dr. V.N. Bapat of Health Physics Division, Dr. T. Saranathan of Spectroscopy Division and Shri U.R. Kini of Division of Radiological Protection for permission to use their equipment and for many helpful suggestions and critical discussions.

It is a pleasure to express my gratitude to my colleagues in HPIRD Section, who helped me in many ways.
