ACKNOWLEDGEMENTS

I am deeply indebted to Dr. S.K. Kashyap, M.D., Assistant Director and Head of Medical and Industrial Toxicology Division National Institute of Occupational Health, Ahmedabad under whose able guidance and supervision, I had the opportunity of carrying out this work. It is largely due to his keen interest wise and constructive suggestions that the present work has taken its shape.

I am extremely grateful to Dr. S.K. Chatterjee, M.B.B.S., DPH, DIH, Phd. Director, National Institute of Occupational Health Ahmedabad for providing me the necessary facilities and all the assistance in conducting this work and for his continuous encouragement throughout the present study.

I owe a debt of gratitude to Dr. N.L. Ramanathan, now, Director, Environmental planning and Coordination, Department of Science and Technology, New Delhi and to Dr. S.K. Nigam, Asstt. Director of this Institute for valuable suggestions and critical discussions at various stages.

I am thankful to Mr. P.K. Kulkarni, Statistician, N.I.O.H., and to Mr. Anand Makwana (Artist) for their assistance in the analysis of data and for preparing the graphs and charts.
I gratefully acknowledge the staff especially Mr. J.P. Jani, of Medical and Industrial Toxicology division for their help during the course of this investigation, and to all my colleagues who in one way or another assisted me in conducting this work and in preparing this manuscript.

In the end I am highly thankful to Mr. K. Madhavankutty for his keen interest and hard work in typing this script.

(S. K. GUPTA)
