"ACKNOWLEDGEMENTS"

I wish to acknowledge the help of many friends and associates who have devoted their valuable time and efforts to my cause and deserve my explicit thanks. Though it would be impossible to acknowledge adequately all the persons who have helped me directly or indirectly during the course of my thesis work, nevertheless I can not help expressing my deep sense of gratitude to some of them.

First of all I thank sincerely Dr. Atul C. Sarma, my guide for suggesting this thesis topic and his valuable guidance and inspiration throughout the development of this thesis. The freedom of work and constructive guidance offered by him, coupled with the continued close interest in my progress and his ever helpful attitude leave me with a deep sense of indebtedness to him. I am also grateful to him for reading through the thesis and making many valuable suggestions for its improvement.

I have greatly benefitted from indepth discussion that I had with Dr. R. Radhakrishna from time to time. The encouragement and help received from him has helped me immensely to complete this work. I am indeed grateful to him for all the help.

I had the benefit of discussing my work with Dr. Kirit Parikh from ISI covering various aspect of research reported in this thesis and I am grateful for the valuable suggestions offered by him which helped me to improve the quality of work.

My thanks are also due to Shri B.D. Srilan of Mac Ltd who was always helpful in extending all the help regarding
collection of data and offering valuable suggestions during the course of my study.

To Shree P.D. Desai, system analyst of IIAC Ltd, I am particularly indebted for the initiation to the data system and various aspects of project development.

It is a pleasure to acknowledge many useful discussions and suggestions I had from Shri R.P. Soni of Gujarat University Computer Centre. I thank him for his keen interest in the progress of my work and constant encouragement offered by him.

I was much benefitted from the discussion with Shri P.S. Shah of P.R.L. Computer Centre. I thank him for the encouragement, helpful attitude and interest shown by him in my work.

To Jani and his team, I owe special thanks for helping me with the diagrams. To Parmar I owe a deep sense of appreciation for having enjoyed typing this manuscript.

October, 1979.
