CONTENTS

Synopsis
List of figures

CHAPTER-1  INTRODUCTION

1.1  Historical
1.2  Scope and object of the present work
1.3  Review of work done by earlier workers:
  1.3.1  TL glow curve parameters
  1.3.2  Thermoluminescence characteristics—Physical factors:
    a) Hole of impurities and their concentration in the host lattice
    b) Effect of heat treatment
    c) Effect of gamma irradiation
    d) Effect of UV irradiation
    e) Effect of residual thermoluminescence
  1.3.3  Thermoluminescence spectral studies and intrinsic efficiency evaluations
  1.3.4  SSR techniques in TL studies
  1.3.5  Thermoluminescence processes—models
  1.3.6  CaSO₄ TL phosphors in radiation dosimetry

CHAPTER-2  MATERIALS AND INSTRUMENTS

2.1  CaSO₄ samples for the present investigation:
  2.1.1  Preparation
  2.1.2  Analysis
2.2 Instruments:
2.2.1 TL glow curve recorders 41
2.2.2 TL spectrum analyser 44
2.2.3 ESR spectrometer 45
2.2.4 Irradiation facilities 45

CHAPTER 3 EFFECT OF THE DOPANTS ON TL GLOW CURVES, ESR SPECTRA AND TL EMISSION SPECTRA

3.1 TL glow curves 47
3.2 ESR spectra 53
3.3 TL emission spectra 54
3.4 Conclusions 70

CHAPTER 4 EFFECT OF DOPANT CONCENTRATION AND HEAT TREATMENT ON THE TL

4.1 Effect of dopant concentration on the TL glow curve pattern 72
4.2 Concentration quenching 73
4.3 Effect of high temperature treatment 74
4.4 Conclusions 77

CHAPTER 5 TL GLOW CURVE ANALYSIS

5.1 Glow curve pattern from 100°K to 800°K 79
5.2 Effect of gamma dose on the TL glow curve pattern 80
5.3 Dose vs. TL output relationship 80
5.4 Evaluation of activation energy and order of kinetics 82
5.5 TL decay characteristics at ambient temperature 86
5.6 Conclusions 86

CHAPTER-6 TL-ESR CORRELATION STUDIES AND A MODEL FOR THE TL PROCESS
6.1 Gamma dose vs. ESR and TL signals buildup 88
6.2 Room temperature decay characteristics of ESR-TL signals 88
6.3 Thermal annealing characteristics of ESR-TL signals 88
6.4 Possible model for the TL process in CaSO₄(Re) phosphors 92
6.5 Conclusions 93

CHAPTER-7 ABSOLUTE TL EMISSION SPECTRUM AND EVALUATION OF INTRINSIC EFFICIENCY
7.1 New method to construct the absolute TL spectrum 95
7.2 Intrinsic efficiency calculation 98
7.3 Conclusions 100

CHAPTER-8 EFFECT OF RESIDUAL THERMO-LUMINESCENCE
8.1 Effect of RTL on gamma sensitivity 102
8.2 Effect of RTL on UV sensitivity 104
8.3 Conclusions 106
CHAPTER-9  APPLICATION IN RADIATION DOSIMETRY

9.1 Gamma dosimetry  107
9.2 UV dosimetry  111
9.3 Conclusions  114

CHAPTER-10  SUMMARY

10.1 Experimental results  115
10.2 Development and application  117
10.3 Conclusions  118
10.4 Scope for future research  119
