ACKNOWLEDGEMENTS

With great pleasure, I take this opportunity to express my indebtedness to Dr. C.M. Sunta, Head, Internal Dosimetry Section, Health Physics Division, Bhabha Atomic Research Centre, for his continued guidance throughout the course of this work.

I feel elated in expressing my profound sense of gratitude to Shri S.D. Soman, Head, Health Physics Division, who was the primary source of inspiration for me while entering the field of Solid State Nuclear Track Detection. My thanks are also due to Shri S. Somasundaram, Head, Radiation Hazards Control Section, for his keen interest in the work and for giving guidance and help during the writing of this thesis.

My thanks are also due to Shri T. Subbaratnam, Head, Power Projects Safety Section and Dr. S.K. Mehta, Health Physicist-in-charge, Radiological Labs, for their continued interest in this research programme and the constant encouragement which I received from them from time to time.

I am grateful to Shri Hari Singh of NUMEC, Radiological Group for his help in the evaluation of spark counting data. Thanks are also due to Shri E. Gopimthah for his help in the application of spark counting to Neutron Dosimetry. I am thankful to Dr. P.Kotrappa and Shri N.S. Pimpale for their help in Radon-Thoron Dosimetry experiments. The help extended by Shri S.M. Shah during the course
of experiments on Gamma Dosimetry in the Megarad region is also gratefully acknowledged.

I am also grateful to Dr. Jozef Palfalvi, Central Research Institute for Physics, Budapest, Hungary, Dr. G.Venkatraman, Division of Radiological Protection, BARC, Dr. R.H. Iyer, Radiochemistry Division, BARC and Dr. V.N. Bapat, Health Physics Division, BARC, for many useful discussions in the course of writing this thesis.

Technical assistance rendered by Sarvashri J.K. Samuel, M.R. Ponkshe, K.S. Kamraj (all from Radiochemistry Division), V.R. Deo, P.V. Kumar, R.K. Samant, G.B. Joshi and D.A.R. Babu (from Health Physics Division) is gratefully acknowledged.

Cooperation extended by Dr. D.P. Bhanti and Shri B. Raghunath in taking the Scanning Electron Microscope Photographs is also acknowledged. Help rendered by Shri N. Raman in taking the microphotographs has proved invaluable. Thanks are also due to Shri S.S. Bhave and Shri C.G. Sawant for doing an excellent job while preparing the figures of this thesis.

Finally, I thank Shri E.K. Ulahaman for the fine secretarial assistance rendered in the preparation of this thesis.
