ACKNOWLEDGEMENTS

The author thanks Professor J.J. Chinoy, M.Sc., Ph.D., D.I.C., F.N.A.Sc., Botany Division, Gujarat University, Ahmedabad for suggesting the problem, as well as for guidance and constant encouragement throughout the course of this work and for his constructive criticism and advice during every stage of this work.

I am deeply indebted to Shri A.B. Vora, Miss U.H. Acharya and Shri T.S. Pathan for their help in collection of growth data. My grateful thanks are due to Mrs. R.M. Vyas for helping me in determinations of ascorbic acid.

Last, but not the least, I must express my gratitude to Rev. Herbert A. de Souza, S.J., Principal and to Professor G.A. Kapadia, Head of the Biology Department, St. Xavier's College, Ahmedabad for facilities and continuous encouragement without which it would not have been possible to carry out this work.
