CONTENTS

PREFACE ............................................ (i)

ACKNOWLEDGEMENTS .................................. (iii)

CHAPTER I

INTRODUCTION ...................................... 1

CHAPTER II

DESCRIPTION OF THE AREA .......................... 18

A. SITUATION AND TOPOGRAPHY
B. ECOLOGICAL FACTORS
   1. Abiotic components
   2. Biotic components

CHAPTER III

GENERAL VEGETATION ................................ 39

CHAPTER IV

VEGETATION ANALYSIS ................................ 54

   1. General methods of study
   2. Classification of plant communities
      (called here as associations)

CHAPTER V

STRUCTURE AND COMPOSITION OF FIVE RESERVED
FOREST ASSOCIATIONS, THEIR INTERCOMPARISONS
AND DISCUSSION ................................... 68

CHAPTER VI

PRODUCTIVITY STUDIES ............................. 117

   1. Net bole-volume (standing crop) in
      the representative stands of the five
      forest associations, per unit area.
   2. Net-production relations of five
      important tree species of Dangs forests
