**CHAPTER 1. Introduction**

1.1 Definition of corrosion 1
1.2 Forms of corrosion 1
1.3 Electrochemistry of corrosion 4
1.4 Types of cells 7
1.5 Standard electrode potentials 8
1.6 Galvanic series 13
1.7 Evans diagram 18
1.8 Importance of corrosion research 28
1.9 Aim and scope of present investigation 30

**PART I. CORROSION OF METALS IN SEA BRINES AND BITTERNS**

**CHAPTER 2. Review of the work on corrosion of Metals in sea water** 36- 58

2.1 Corrosion in sea water 36
2.2 Corrosion inhibitors 50

**CHAPTER 3. Materials and Methods** 67-79

3.1 Specimens and their composition 67
3.2 Immersion tests 67
3.3 Derusting 69
3.4 Calculation of corrosion rate 70
3.5 Potential measurement 71
3.6 Polarization measurement 72
3.7 Chemical analysis 76
3.8 Photo-micrography 76
3.9 Surface preparation and painting procedure 78

**CHAPTER 4. Discussion of the results - Corrosion of metals in sea water concentrates** 81-112

4.1 Composition of sea water concentrates 81
4.2 Results of the study on corrosion in sea water concentrates 83
4.3 Aluminium ... 98
4.4 Copper and its alloys ... 99
4.5 Mild steel 102
4.6 Stainless steel ... 103
4.7 Zinc ... 108
CHAPTER 5. Discussion of the results - corrosion inhibitors in brines and bitterns

5.1 Potassium chromate 117
5.2 Sodium hexametaphosphate 123
5.3 Agar-agar and Gelatine 124
5.4 Cutting oil 125
5.5 Sodium silicate and sodium nitrite 128
5.6 Sodium benzoate 129
5.7 E.D.T.A., Thiourea,Tributalamine 129
5.8 Sodium diethyl dithiocarbamate 129
5.9 Paints 130

CHAPTER 6. Discussion of the results - steady state potentials and Polarizations 137-167

6.1 3.5° Be' sea brine 138
6.2 10° Be' sea brine 140
6.3 13°Be' sea brine 141
6.4 18° Be' sea brine 148
6.5 28° Be' bittern 148
6.6 36° Be'.bittern 149
6.7 Polarization of aluminium 151
6.8 Polarization of mild steel 158

PART II. ATMOSPHERE CORROSION

CHAPTER 7. Review of literature on atmospheric corrosion of metals 170-188

7.1 Factors influencing atmospheric corrosion 170
7.2 Behaviour of different metals under variety of exposure conditions ... 177

CHAPTER 8. Methods and Materials 192-200

8.1 Exposure sites 192
8.2 Methods of exposure 193
8.3 Specimens used 193
8.4 Determination of atmospheric sulphur dioxide 194
8.5 Measurement of atmospheric salinity 196
8.6 Humidity measurement 198
8.7 Wind velocity measurement 199
CHAPTER 9. Examination of methods for ammonia determination in polluted atmosphere

9.1 Possible methods for ammonia determinations
9.2 Laboratory study
9.3 Determination in polluted atmosphere

CHAPTER 10. Results and Discussions of the atmospheric corrosion study

10.1 Atmospheric corrosion at Bhavnagar
10.2 Atmospheric corrosion at E.S.F., Bhavnagar
10.3 Atmospheric corrosion at Rajkot
10.4 Atmospheric corrosion at Porbandar
10.5 Relative corrodibility at the four sites
10.6 Protective coatings for structures

CHAPTER 11. Conclusions
