ACKNOWLEDGEMENTS

First of all I am indebted to my home-institution—particularly the Department of Chemistry, Gujarat College, Ahmedabad, for extending the generous support to carry my efforts in conducting this work.

Subsequently, I have an opportunity especially to acknowledge my indebtedness to some veterans here in the field of environmental pollution, due to their efforts and well-wishes my volition of research always being supported. Shri Shri Badanandishji, Shri Shri Bhagvijayshishji, Prof. V. D. Mehta, Shri D. N. Mehta and Dr. G. S. Pradhan, have markedly triggered my propensity to work in this field of research. Dr. U. I. Bhatt and Dr. P. P. Desai were my close experts, in their faculties, who professionally made me competent to serve the real self of my work. Dr. U. I. Bhatt's scientific criticism and subject rationale have always been to cover the topics in sufficient depth and breadth and to shape the research undertaking adequately. The candid queries and cautious suggestions during my study, from Shri N. B. Dave, have provided me with the potential to stoop to my research.

I am also grateful to various State and Central Government departments viz., India Meteorological Department, Geological Survey of India, Central Water Commission—specially its Hydrological and Flood Division, Irrigation Department, Industries Department, Census Unit—Bureau of Statistics, Public Health Engineering Department, Pollution Control Department, Forest and Agricultural Department and many other offices from where I could personally have the necessary basic information of my research area.

Thanks are specially expressed to various organisations viz., School of Sciences—Gujarat University, Central Laboratory—Ahmedabad Municipal Corporation, Public Health Engineering Laboratory—Baroda, National Environmental Engineering Research Institute—Bhopal, National Institute of Occupational Health—Ahmedabad, Physical Research Laboratory—Ahmedabad, Textile Manufacturers' Association, Community Science Centre and Indian Space Research Organisation for their kind response during my research proceedings.
I owe a great deal to the various researchers and authors, whose literatures were taken as reference support in designing and fortifying my study.

I sincerely express my appreciation for the help rendered by my friends, co-workers, senior colleagues, staff members and their well-wishes are heartily acknowledged.

Lastly I should not miss the opportunity to appreciate the heartfelt support received from my wife — in achieving the aim of my research — embodying this piece of Ph.D. thesis.

G. K. TRIVEDI
