STATEMENT

No part of this thesis has been submitted for a degree or diploma or any other academic award.

The literature concerning the problem investigated has been thoroughly surveyed and all the necessary references are given in the thesis. In accordance with the usual practice, due acknowledgement has been made wherever the work is based on the result of the other workers.

The experimental work has been carried out entirely by me. The pharmacological activities are tested with due standardisation. It gives contribution in finding of new pharmacologically active synthetic products.
