Put a circle around the serial number of the subjects opted by you, from among the following:-

Instructions

1. First of all, fill in the above blanks and have your exercise-books ready for figuring.
2. You too have to read these instructions to yourself, while the examiner reads them aloud. After that the test booklet will be given to you.
3. Try to understand the question fully, before attempting any question from the test booklet. Then find out the answer by calculations.
4. In doing calculations, try to do them to yourself, but you may use your exercise books if you need it for figuring.
5. Do not spend too much time on any one question. But work steadily in order to avoid mistakes. However try to work as quickly as you can.
6. You may drop any question you cannot solve but then see to it that you indicate your answer at the proper place, for the question that follows.

7. See to it that you do not need to make any change once you have indicated your answer. If you made a circle at a wrong place cross it out but do not waste time in erasing.

8. You have not to write anything in the test booklet. You should not even put dots or signs.

9. When you get the test booklet, try to find answers to the practice problems, given on the cover page. Indicate your answers by putting circle on the relevant response in the frame given below.

10. When you finish practice problems wait for further instructions. Start working on questions 1 to 50 in the test booklet only when you are instructed to do so. The answers are to be indicated by putting circles around the right responses on the reverse of this sheet.

11. After 40 minutes when you will be instructed to stop, stop work immediately, cover the answer-sheet by the test-booklet and return both of them.

12. Do not ask anyone anything during the test proper and keep your answers covered under your note-book.
In this frame indicate your answers to the practice problems by putting circles.
